

# Mortgage Life Insurance

Product Information and  
Terms and Conditions

**Mortgage Life Insurance  
is provided by  
Irish Life Assurance plc.**

**EBS**

## About us

Mortgage Life Insurance is provided by Irish Life Assurance plc (Irish Life) at the request of EBS. Irish Life is part of the Great-West Lifeco group of companies, one of the world's leading life assurance organisations. Any reference to 'we' or 'us' refers to Irish Life as Irish Life is the provider of this product. As well as offering advice when you take out a plan in return for any remuneration EBS receives, EBS will also help you with any questions about your plan(s) and offer you a financial review annually.

EBS d.a.c. is tied to Irish Life Assurance plc for life and pensions business. EBS d.a.c. is regulated by the Central Bank of Ireland. Irish Life Assurance plc, trading as Irish Life, is regulated by the Central Bank of Ireland.

## Suitability and Customer Target Market

This plan might suit you if you want help to repay your mortgage if you die or suffer one of the specified illnesses that we cover during the term of the plan.

## Solvency and Financial Condition Report

Our Solvency and Financial Condition Report is available on our website at [irishlife.ie](https://irishlife.ie).

## Consumer Credit Act 1995

You can get details of the proposed mortgage loan, including a statement of the Annual Percentage Rate (APR), from your lender. If the interest rate for your mortgage is variable, your lender may change the payment rates on the mortgage.

**Warning: Your home is at risk if you do not keep up payments on a mortgage or any other loan secured on it.**

## Mortgage Life Insurance

**Part one** is an introduction.

**Part two** is the Customer Information Notice.

**Part three** is the Terms and Conditions.

**We recommend that you get regular advice from your EBS financial adviser, in particular, before you make any changes to your plan.**

All information including the Terms and Conditions of your plan will be provided in English.

The information and figures in this booklet are correct as at November 2024 but may change.

# 1

## Introduction to Mortgage Life Insurance

The main benefit on this plan is life cover and you have the option to add specified illness cover. Normally you will transfer ownership of this plan to your mortgage lender. The benefits are paid out on this plan if you die or where you have chosen specified illness cover and are diagnosed with a specified illness that we cover. The benefits can be used towards paying off some or all of what is left on your mortgage, assuming your mortgage interest rate has not, on average, risen above the interest rate we have assumed.

The level of cover reduces to keep the cost of this plan lower than other forms of life assurance.

If you stop making your regular payments, you will no longer be protected and we will not return your money to you. You cannot cash in this plan; it is not a savings plan.

### Mortgage Life Insurance highlights

**Suitable for**  
people aged  
18 to 74

**Decreasing  
Life Cover**

**Decreasing  
Specified Illness  
Cover**

**Your regular  
payments are  
fixed**

For more details on the life cover and specified illness cover see sections 2 and 3.

## **We will pay out a lump sum if you die during the term of your plan.**

There are three options for Mortgage Life Insurance and who you can protect:

1. single cover - we will make the payment if you die during the term of the plan; or
2. dual cover - we could make the payment twice, once if you die within the term of the plan and once if the other life assured also dies within the term of the plan; or
3. joint cover - we will make the payment if you or the other life assured dies (whoever dies first) during the term of the plan. This means we will only pay once.

When you take out life cover, your children are automatically covered also. See children's cover under section 4 for the amounts available.

## **The cost of life cover**

- Depends on your age, health, smoker status, amount of cover and how long you want to be covered for. The minimum payment every month is €13.13 including the government levy of 1% (November 2024). This plan is paid by direct debit. You can choose to pay every month, three months, six months or year.
- The payments you make cover the cost of setting up and managing the plan, including sales and commission costs, the cost of providing your life cover and if you choose it, the cost of the specified illness benefit.

## **Important information**

- You must be aged 18 to 74 to start this cover.
- The term you can have cover for is from 5 to 40 years or up to age 85, whichever is earlier (some benefits end earlier than age 85, see section 4 for more details).
- We will not pay claims or will reduce the amount paid on a claim in certain circumstances – for example if you have not fully answered the questions in your application honestly and with reasonable care, including the questions about your health, occupation, smoking habits, hobbies, pastimes or any extra disclosures and confirmations, in relation to Insurance Ireland's 'Code of practice for Underwriting Mortgage Protection Insurance for Cancer Survivors'.
- If you choose 'guaranteed cover again', you can change your cover to another guaranteed plan. Please see section 4 for more information on this.

# Specified Illness Cover

This benefit pays you a lump sum if you are diagnosed with one of the 48 conditions we cover. Specified illness cover under this plan is an 'accelerated' benefit. This means that if we pay your specified illness cover claim, we will reduce your life cover by the amount you receive.

We have also identified a further 41 conditions that we will make additional payments on. If you chose specified illness cover, your children are automatically covered also. See children's cover under section 4 for the amounts available.

## Below are the 48 conditions we cover for full payment.

See the Terms and Conditions for a detailed description of these.

We have identified conditions that could change your life so much that you would need financial help. Within this we have a condition called 'loss of independence'. We include this condition to make your total cover more wide-ranging. It will be particularly valuable as you get older.

1. Alzheimer's disease - resulting in permanent symptoms
2. Aorta graft surgery - for disease or traumatic injury
3. Aplastic anaemia - of specified severity
4. Bacterial Meningitis - resulting in permanent symptoms
5. Benign brain tumour or cyst - resulting in permanent symptoms, surgery or radiosurgery
6. Benign spinal cord tumour or cyst - resulting in permanent symptoms, surgery or radiosurgery
7. Blindness – permanent and irreversible
8. Brain injury due to anoxia or hypoxia - resulting in permanent symptoms
9. Cancer - excluding less advanced cases
10. Cardiac arrest - with insertion of a defibrillator
11. Cardiomyopathy - resulting in a marked loss of ability to do physical activity
12. Chronic Pancreatitis - of specified severity
13. Coma - with associated permanent symptoms
14. Coronary artery by-pass grafts
15. Creutzfeldt-Jakob Disease - resulting in permanent symptoms

16. Crohn's disease - of specified severity
17. Deafness - total, permanent and irreversible
18. Dementia - resulting in permanent symptoms
19. Encephalitis - resulting in permanent symptoms
20. Heart attack - definite diagnosis
21. Heart valve replacement or repair
22. Heart structural repair
23. HIV infection - caught in the European Union, United Kingdom, Norway, Switzerland, North America, Canada, Australia and New Zealand, from a blood transfusion, a physical assault or at work in the course of performing normal duties of employment.
24. Intensive Care - requiring mechanical ventilation for 10 consecutive days
25. Kidney failure - requiring permanent dialysis or transplant
26. Liver Failure - irreversible and end stage
27. Loss of Independence - permanent and irreversible
28. Loss of limb - permanent physical severance
29. Loss of speech - permanent and irreversible
30. Major organ transplant - specified organs from another donor
31. Motor neurone disease - resulting in permanent symptoms
32. Multiple sclerosis or Neuromyelitis optica (Devic's Disease) - with past or present symptoms
33. Necrotising Fasciitis
34. Paralysis of One limb - total and irreversible
35. Parkinson's disease (idiopathic) - resulting in permanent symptoms
36. Parkinson Plus Syndromes - resulting in permanent symptoms
37. Peripheral Vascular Disease - with bypass surgery
38. Pneumonectomy - the removal of a complete lung
39. Primary Sclerosing Cholangitis - of specified severity
40. Pulmonary Arterial Hypertension (idiopathic) - of specified severity
41. Pulmonary Artery Graft Surgery
42. Respiratory Failure of specified severity
43. Short Bowel Syndrome - requiring permanent parenteral nutrition
44. Spinal Stroke - resulting in permanent symptoms
45. Stroke - of specified severity
46. Systemic lupus erythematosus - of specified severity
47. Third Degree Burns of specified surface area
48. Traumatic brain injury - resulting in permanent symptoms

---

We do not make a full payment for any other conditions.

Once you claim for your full specified illness cover, your specified illness cover ends and you cannot make any further specified illness claims, including an additional payment claim.

## Additional Payment

We have an additional 41 conditions that we will make a separate payment on if you have specified illness cover, if you have not already claimed for one of the above 48 conditions.

You can only receive an additional payment if you have taken out specified illness cover. The additional payment on these illnesses is totally separate from your main specified illness cover benefit.

That means it does not generally affect the amount you could receive if you need to make a specified illness claim for one of the 48 conditions.

See the Terms and Conditions for more details and a description of each condition.

### Below are the 41 conditions we cover for additional payment.

1. Aortic Aneurysm with endovascular repair
2. Brain Abscess drained via craniotomy
3. Cancer in situ of the anus - treated by surgery
4. Cancer in situ of the cervix - with specified surgery
5. Cancer in situ of the colon or rectum - resulting in intestinal resection
6. Cancer in situ of the larynx - with specified treatment
7. Cancer in situ of the lung and bronchus - treated by specified surgery
8. Cancer in situ of the oesophagus, treated by specified surgery
9. Cancer in situ of the oral cavity or oropharynx - treated by surgery
10. Cancer in situ of the renal pelvis and ureter - of specified severity
11. Cancer in situ of the testicle - requiring surgery to remove at least one testicle
12. Cancer in situ of the urinary bladder
13. Cancer in situ of the uterus - with specified surgery
14. Cancer in situ of the vagina - with surgery
15. Cancer in situ of the vulva - with surgery
16. Ductal Carcinoma in situ - Breast, treated by surgery
17. Cancer in situ - other (sites not already mentioned) - with surgery
18. Carotid Artery Stenosis - treated by endarterectomy or angioplasty
19. Central retinal artery or vein occlusion (eye stroke) resulting in permanent visual loss
20. Cerebral or spinal aneurysm – with surgery, stereotactic radiosurgery or endovascular repair
21. Cerebral or spinal arteriovenous malformation - with surgery, stereotactic radiosurgery or endovascular repair
22. Coronary Artery Angioplasty - of specified severity
23. Crohn's disease - treated with surgical intestinal resection
24. Cystectomy - removal of the complete bladder

- |  |   |
|--|---|
| <p><b>25.</b> Gastrointestinal Stromal Tumour (GIST) - with surgery</p> <p><b>26.</b> Implantable cardioverter defibrillator (ICD) for primary prevention of sudden cardiac death</p> <p><b>27.</b> Liver resection</p> <p><b>28.</b> Low Level Prostate Cancer with Gleason score between 2 and 6 and with specified treatment</p> <p><b>29.</b> Neuroendocrine Tumour (NET) of low malignant potential - with surgery</p> <p><b>30.</b> Ovarian Tumour of Borderline Malignancy / Low Malignant Potential - with surgical removal of an ovary</p> <p><b>31.</b> Peripheral vascular disease - treated by angioplasty</p> <p><b>32.</b> Permanent Pacemaker Insertion for heartbeat abnormalities</p> | <p><b>33.</b> Pituitary tumour - resulting in permanent symptoms or surgery</p> <p><b>34.</b> Serious Accident Cover - resulting in at least 28 consecutive days in hospital</p> <p><b>35.</b> Severe Burns/3rd degree burns covering at least 5% of the body's surface</p> <p><b>36.</b> Significant visual impairment - permanent and irreversible</p> <p><b>37.</b> Single lobectomy - the removal of a complete lobe of a lung</p> <p><b>38.</b> Surgical removal of one eye</p> <p><b>39.</b> Syringomyelia or Syringobulbia - treated by surgery</p> <p><b>40.</b> Thyroid Cancer - early stage with surgery</p> <p><b>41.</b> Total colectomy, including colectomy for ulcerative colitis.</p> |
|--|---|

---

### Example of how specified illness cover works.

- Mary has €100,000 life cover and €75,000 accelerated specified illness cover with us. Mary is diagnosed with kidney failure which is one of the 48 conditions we cover on a full payment basis:
- We will pay the €75,000 accelerated specified illness cover. She has no specified illness cover left and no option to claim for an additional payment.
- Mary has €25,000 life cover left after her specified illness cover claim is paid.

### Paying surgery benefit immediately

If you are diagnosed as needing aorta graft surgery, coronary artery bypass graft or heart-valve replacement or repair or heart structural repair and you have given us the evidence we need about your condition, we will pay up to €30,000 of your specified illness cover immediately. We provide this benefit automatically with specified illness cover. It means that you will have a cash lump sum to help you decide when and where you will have your surgery. We will take the amount we pay from your total specified illness benefit.

In addition, if you are diagnosed as needing a major organ transplant, we will pay out your full specified illness cover amount up front. You must be on the official waiting list programme of a major Irish or United Kingdom hospital to receive the specified illness cover payment. You will find definitions of the surgeries we cover in the Terms and Conditions section.

## Important points

- You must be aged between 18 and 64 to take out specified illness cover.
- The term you can have specified illness cover for is from 5 to 40 years. Specified illness cover will end on the plan anniversary before your 75th birthday.
- If you have not fully answered the questions in your application honestly and with reasonable care, including the questions about your health, occupation, smoking habits, hobbies, or pastimes or any extra disclosures and confirmations, in relation to Insurance Ireland's 'Code of practice for Underwriting Mortgage Protection Insurance for Cancer Survivors, we will not pay claims or will reduce the amount paid on a claim.
- We will not pay the specified illness cover if you die, only if you are diagnosed during the term of your plan with one of the 48 conditions we cover.
- At the start of the plan, we may not agree to cover you against all these illnesses. If this is the case, we will tell you and we will refer to it in your plan schedule.
- You can only receive one full payment with specified illness cover. For example, you cannot claim for a heart attack and then claim for a stroke.
- You can receive more than one additional payment under specified illness cover. If you were later diagnosed as having one of the 48 conditions we cover, you would still receive your full payment.
- We will pay €10,000 on a single vessel coronary angioplasty and a further €30,000 on an angioplasty to a second coronary artery (Payment may be less in some situations).
- For serious accident cover we will only pay one amount – full or additional payment that arises from the same event.

# 4

## Extra Benefits and other services

There is a wide range of additional and optional benefits that are available with this plan.

### Additional benefits

There is no additional cost for these benefits. There are detailed rules, restrictions and requirements related to these benefits set out in the Terms and Conditions.

#### 1. Protection flexibility

Up to the fifth plan anniversary, we have a flexibility option on this plan.

This allows you to increase or decrease the level of benefits or the term of your benefits without cancelling your existing plan and taking out a new one. When you change the benefits or term of your plan, we will work out a new payment at that time. This means the cost of your plan could go up or down.

#### 2. Guaranteed Insurability option

This benefit is available on both life and specified illness cover benefits.

If you start life cover and before the age of 55 you then get married, have a child, take out a new or extra mortgage or get an increase in salary, you can ask us to set up a new life cover plan.

You won't have to provide any information about your health. This option is only available twice.

#### 2. Early payment if you are diagnosed with a terminal illness

##### **Life cover**

If you have life cover and are diagnosed as having a terminal illness, we will pay the level of life cover benefit you have at that time, straight away.

##### **Specified illness cover**

This is an accelerated benefit. If you claim for the terminal illness benefit all the claiming life assured's cover will end.

## 4. Accidental death benefit

This is a temporary automatic benefit available while you are in the process of taking out life cover. We will pay up to €150,000 of the death benefit if you die as a result of an accident.

## 5. Children's life and specified illness cover

### **Life cover**

If you take out life cover, we also automatically cover each of your children up to age 25 for €7,000 life cover for as long as you are covered.

### **Specified illness cover**

If you take out specified illness cover, your children up to age 25 are covered for up to €25,000 or half of your specified illness benefit amount, whichever is lower, for as long as you are covered. We will cover them for the same illnesses you are covered for.

We will only pay one specified illness or life cover claim for each child no matter how many plans you have with us.

Your children are also covered for an additional payment of €7,500 or half your specified illness benefit amount, whichever is lower, for the 41 illnesses covered.

We will pay only one additional payment for each child, even if you have more than one plan with us. If at a later date the child is diagnosed with one of the 48 conditions we cover, we would still pay the full child specified illness cover amount.

## Optional benefit

### **Remember:**

There is an additional cost for this benefit. There are detailed rules, restrictions and requirements related to this benefit set out in the Terms and Conditions section.

## Guaranteed cover again (conversion option)

Guaranteed cover again, also known as a conversion option, allows you to convert your cover to another Mortgage Life Insurance plan (or equivalent) at any stage throughout the term of your plan.

If you wish to avail of this option, you must take it at the start of your plan. Then you will not have to provide any new evidence of health for your new plan. The payments you make will reflect this.

## Other services

### Comprehensive range of services through LifeCare

The **LifeCare** range of services offers you the following, at no extra cost.

#### **Nurse on Call**

– someone to help when you're not sure what to do

#### **Medical Information**

- Nurse on Call is a helpline service that gives you access to qualified nurses for non-emergency medical advice 24 hours a day, 365 days a year

#### **What I can call Nurse on Call about**

- General medical advice
- Advice and information on a range of lifestyle issues such as dietary information, female health, sports injuries and sexual health

#### **Women's Health Advice**

Specialist advice on women's health issues including:

- Menstruation and Fertility: for example, queries around your menstrual cycle and infertility.
- Pregnancy: for example, what to expect from your hospital visits and preparing for a baby.
- Cancer Prevention: for example, queries relating to cancer screening and breast checks.
- Osteoporosis, Menopause and Perimenopause: for example, how to support your health as you get older.

#### **ClaimsCare**

– support if you need to claim

- If you need to make a claim, a dedicated claims assessor will help you through the process.
- You can also avail of eight counselling sessions provided by the Clanwilliam Institute, at no extra cost, if you need to make a life cover claim.

**LifeCare** gives you access to services provided by other companies which are independent from Irish Life. These services are not designed to replace the advice provided by your doctor or your own health professional, but to give you information to help direct you towards the appropriate course of action. Your access to these services depends on their terms and conditions. We accept no responsibility for these services. We may change the service providers or withdraw access to these services in the future.

**For more information on the LifeCare range of services, log on to [irishlife.ie/life-insurance/lifecare](https://irishlife.ie/life-insurance/lifecare).**

# Customer Information Notice

## Part Two

### Contents

#### **A. Information about the policy**

1. Make sure the policy meets your needs!
2. What happens if you want to cash in the policy early or stop paying premiums?
3. What are the projected benefits under the policy?
4. What intermediary/sales remuneration is payable?
5. Are returns guaranteed and can the premium be reviewed?
6. Can the policy be cancelled or amended by the insurer?
7. Information on taxation issues
8. Additional information in relation to your policy

#### **B. Information on service fee**

#### **C. Information about the insurer/insurance intermediary/sales employee**

#### **D. Information to be supplied to the policyholder during the term of the insurance contract**

## A. INFORMATION ABOUT THE POLICY

---

### 1. Make sure the policy meets your needs!

This plan is a regular payment mortgage protection plan. The plan provides protection benefits only i.e. life cover only or life cover and specified illness cover on a reducing scale over a fixed term. The plan cannot be converted to another plan at the end of the fixed term. You are committing to making a regular long term payment. Please make sure this product suits your needs, resources and circumstances.

Your EBS financial adviser must indicate whether paragraph a) or paragraph b) below applies.

- a) This plan replaces in whole or in part an existing plan with Irish Life, or with another insurer. Your EBS financial adviser will advise you as to the financial consequences of such replacement and of possible financial loss as a result.

You will be asked at the beginning of your application form to confirm this in writing. Please ensure that you have completed this section of the form and that you are satisfied with the explanations provided by your EBS financial adviser before you complete the rest of the application form.

- b) This plan does not replace in whole or in part an existing plan with Irish life or with any other insurer, which has been or is to be cancelled or reduced.

### 2. What happens if you want to cash in the policy early or stop paying premiums?

The plan does not ever have a cash or surrender value.

If you stop making payments, all cover under the plan will end and we may refund a portion of your most recent payment so that you will only be charged for the number of days that have passed since that payment. Any payments before your most recent payment will not be refunded.

**Warning: Your home is at risk if you do not keep up payments on a mortgage or any other loan secured on it.**

### 3. What are the projected benefits under the policy

The following payment and benefit details are for a typical Mortgage Life Insurance Plan. The figures will vary based on each individual's personal details and choice of protection benefits. The payment quoted on the next page is correct as at November 2024. Figures for your specific plan details will be shown in your customer information notice in your welcome pack. The figures are based on the following details.

|                            |   |
|----------------------------|---|
| <b>Protection Benefits</b> | Life cover of €180,000  |
|                            | Accelerated Specified Illness Cover of €180,000                                   |
|                            | Cover is on a joint life first death basis.                                       |
| <b>Lives covered</b>       | Male, non-smoker aged 38 next birthday. Female, non-smoker aged 37 next birthday. |
| <b>Payments:</b>           | €91.56 a month payable by direct debit.   |
| <b>Term</b>                | The term of the plan is 20 years.   |

All figures are exclusive of the 1% government levy.

**The plan provides protection benefits up until the end of the 20-year term. Benefits decrease on a monthly basis in line with how the capital outstanding on a mortgage would reduce each month over the mortgage term using an interest rate of 6% pa. The plan does not acquire a cash or surrender value at any stage.**

**Illustrative table of projected benefits and charges.**

|      | <b>A</b>  | <b>B</b>                            | <b>C</b>                               | <b>D</b>                                      | <b>E = A + B - C - D</b>                         |
|------|---|-------------------------------------|--|---|--|

| 5    | 5,494   | 0                                   | 473                                    | 5,021   | 0  |
| 10   | 10,987  | 0                                   | 473                                    | 10,515  | 0  |
| 15   | 16,481  | 0                                   | 473                                    | 16,008  | 0  |
| 20   | 21,974  | 0                                   | 2,502                                  | 19,472  | 0  |

The payment made through the term of the plan includes the cost of the protection benefits, and all charges, expenses, intermediary remuneration and sales remuneration associated with your plan.

The charges shown in Column C include the cost of intermediary/sales remuneration incurred by Irish Life, as described in Section 4 on the next page.

The payments shown exclude any taxes or government levies that may be payable.

#### 4. What intermediary/sales remuneration is payable?

The level of intermediary/sales remuneration shown is based on the typical plan outlined in the previous section. The figures will vary based on the exact plan details in each case. Figures for your specific plan details will be shown in your welcome pack.

| Year | €                            | €   |
|------|------------------------------|---|
|      | Premium payable in that year | Projected total intermediary/ sales remuneration payable in that year |
| 1    | 1,099                        | 990   |
| 2    | 1,099                        | 220   |
| 3    | 1,099                        | 220   |
| 4    | 1,099                        | 220   |
| 5    | 1,099                        | 220   |
| 10   | 1,099                        | 33  |
| 15   | 1,099                        | 33  |
| 20   | 1,099                        | 33  |

The projected intermediary/sales remuneration shown above includes the costs incurred by Irish Life in relation to the provision of sales, service and support for the plan. These costs are included in the plan charges set out in column C of the illustrative table of projected benefits and charges in section 3.

#### 5. Are the returns guaranteed and can the premium be reviewed?

The payment is guaranteed to provide protection cover for a fixed term, assuming no changes to your payment or benefits (other than the predetermined decreases in the benefits).

**The payment rates on your mortgage may be adjusted by the lender from time to time.**

#### 6. Can the policy be cancelled or amended by the insurer?

Yes, we can alter or cancel the plan or issue another plan in its place if certain circumstances happen as in the terms and conditions. These include:

- you stop making payments
- we received the wrong date of birth on your application form
- you do not give or gave incorrect information on your application form.

We may end your cover and refuse to pay a claim, or reduce the amount paid on a claim if you do not give us information (or if you give us incorrect information) in response to the questions in your application regarding an illness or condition that will affect our assessment of your application for this plan. If that information is not true or if we do not receive all relevant information required by the questions in your application, we may end your cover and refuse to pay any claim, or reduce the amount paid on a claim.

If we end your cover for this reason, you will lose all rights under the plan and we may not refund your payments. We will send you a copy of the main application form that you have filled in for us.

## **7. Information on taxation issues**

Under current Irish tax law (November 2024), tax does not usually have to be paid on life cover or specified illness cover benefits, but in some circumstances tax may be due. For example, if the life cover is paid to your estate, your beneficiaries may have to pay inheritance tax (there is no inheritance tax due on an inheritance between married couples or registered civil partners).

Tax may have to be paid when the plan is owned by a company or if payments are made by anyone other than the legal owner of the plan, for example from a company or business account. In these circumstances we recommend that a tax adviser be consulted regarding any possible taxation implications.

Please contact your EBS financial adviser or Irish Life if you do not fully understand the likely tax treatment of any benefits payable in connection with your Mortgage Life Insurance plan. We recommend that you seek independent tax advice in respect of your own specific circumstance.

Any taxes or levies imposed by the government will be collected by Irish Life and passed directly to Revenue.

## **8. Additional information in relation to your policy**

Please read this booklet, including the terms and conditions section for all information on this plan.

## B. INFORMATION ON SERVICE FEE

---

There are no charges payable to Irish Life other than those set out in your table of benefits and charges and in these Terms and Conditions.

## C. INFORMATION ABOUT THE INSURER/INSURANCE INTERMEDIARY/SALES EMPLOYEE

---

### **Insurer**

Your Mortgage Life Insurance Plan is provided by Irish Life Assurance plc, a company authorised in Ireland. Irish Life Assurance plc is regulated by the Central Bank of Ireland. You can contact us at Irish Life Centre, Lower Abbey Street, Dublin 1, Ireland by telephone at 01 704 1010.

### **Insurance Intermediary / Sales Employee**

The EBS financial adviser should insert details of their name, legal status, their address for correspondence and a contact telephone number number or e-mail address and where relevant, the companies with whom agencies are held.

#### **Insurance Intermediary**

EBS d.a.c.

10 Molesworth Street

Dublin 2 D02 R126

Telephone 01 665 9000

Fax 01 665 8818

Email [info@ebs.ie](mailto:info@ebs.ie)

No delegated or binding authority is granted by Irish Life to your EBS financial adviser in relation to underwriting, claims handling or claims settlement.

## D. INFORMATION TO BE SUPPLIED TO THE POLICYHOLDER DURING THE TERM OF THE INSURANCE CONTRACT

---

During the term of your contract, we are obliged to inform you if we change:

- our name;
- our legal status;
- our head office address;
- any term of the contract which results in a change to the information given in this document.

# Terms & Conditions

## Part three

Please read this document carefully as it contains important information.

Please keep it safe, as you will need it in the future.

# Contents

---

## **Definitions**

### **Section 1**

Defines some of the words we use in the terms and conditions.

## **Mortgage Life Insurance**

### **Section 2**

Describes the details of the plan.

## **Making payments**

### **Section 3**

Explains your responsibilities to make payments and explains what happens if you fall behind with your payments.

## **Your cover**

### **Section 4**

Explains the benefits you can choose under the plan.

## **Changing the Level of Cover**

### **Section 5**

Explains how your benefits reduce over the term of the plan, how you can take out some additional cover and have the right to alter your cover.

## **Exclusions**

### **Section 6**

Explains the circumstances in which we will not pay benefits.

## **Claims**

### **Section 7**

Explains how to make a claim and how we will assess your claim.

## **Tax**

### **Section 8**

Deals with tax law and what will happen if there is any change in the law relating to tax.

## **Cancellations**

### **Section 9**

Explains your right to cancel the plan within 30 days.

## **Complaints**

### **Section 10**

Explains how to make a complaint.

# Definitions

## Section 1

**Explains some of the important words we use in the Terms and Conditions.**

Certain words used in these Terms and Conditions have specific meanings, which might be different from the meaning they would have in general use. These words are listed below, together with an explanation of their meanings in relation to this plan.

---

### **Active Treatment**

This is the use of surgery, radiation therapy, chemotherapy, biological agents, immunotherapy, bone marrow transplant or any evidence-based medical approaches to cure a cancer. These therapies may have been employed in both the primary (adjuvant and neoadjuvant) settings and secondary setting. Active Treatment excludes anti-hormonal medications or any form of preventative therapy or medicine designed to reduce recurrence risk following complete remission.

### **Application form**

This is the application form that you complete for this plan. Where you are exercising your guaranteed cover again option or conversion option, this also includes the original application form for your existing plan.

### **Benefit (or benefits)**

The benefit shown in the plan schedule. If, at any stage during the term of your plan, you choose to reduce your benefit amounts, your benefit amount will be lower than that shown on your schedule, allowing for normal benefit reductions under the plan. We will send you a revised plan schedule showing your new benefit amounts at that time.

### **Child**

Someone who is under 25 and who:

- is shown by birth certificate to be the son or daughter of a life assured; or
- has been legally adopted by a life assured.

### **Code of Practice**

The Insurance Ireland - Code of Practice for Underwriting Mortgage Protection Insurance for Cancer Survivors (2023), as may be amended, supplemented or superseded from time to time. We adopted the Code of Practice on 9 December 2023. The Code in force at the time of the draw down of the mortgage shall be deemed to be the applicable and relevant Code for the purposes of assessing any claim.

### **Complete Remission**

Complete remission is determined by a cancer survivor's treating oncologist. This includes the absence of signs and symptoms related to a cancer diagnosis which may be determined by, but not limited to, physical examination, radiological investigation and serum biomarkers.

## **Day**

A period of 24 hours in a row.

## **Expiry date of the life cover benefit**

The plan expiry date – this is shown in the plan schedule. The life cover will end on this date unless it has ended earlier.

## **Expiry date of the specified illness cover benefit**

The plan expiry date or expiry date of the specified illness cover benefit – whichever is shown in the plan schedule. The specified illness cover will end on this date unless it has ended earlier.

## **Irreversible**

An illness or condition is irreversible if after having appropriate treatment, including surgery, there is no reasonable hope of a recovery according to medical knowledge at that time.

## **Life assured or lives assured**

The person or people named in the plan schedule as the life or lives covered.

## **Major hospital**

An institution in one of the accepted countries (see section 6.4), which has facilities for diagnosis, treatment and major surgery and has accommodation for in-patients. It does not include a long-term nursing unit, a geriatric or pre-convalescent ward, or an extended-care facility for convalescence, rehabilitation or other similar function. We reserve the right to insist that a major hospital is a hospital in Ireland or the United Kingdom.

## **Medical specialist**

A registered medical practitioner (see below) who has specialist qualifications in an appropriate branch of medicine and who is practising at a major hospital (see above).

## **Month**

A calendar month.

## **Payment**

This is:

- 'your total payment' as shown in the plan schedule';
- the amount we tell you when we reinstate cover under section 3.4; or
- a different amount (which we will tell you) if we or you make any amendment to your plan details.

## **Plan schedule**

The plan schedule that sets out the details of your plan and forms part of the contract.

## **Principal private residence**

A principal private residence is where the applicant lives most or all of the time. This includes first time buyers, home movers and re-mortgages but not second homes or buy to let mortgages.

## **Registered medical practitioner**

A person who meets the legal requirements for carrying on a medical practice in an accepted country (see section 6.4) and who actually practices medicine in that country. We reserve the right to insist that a registered medical practitioner practices in Ireland or the United Kingdom.

## **Start date**

The start date shown in the plan schedule. Cover will start on this date.

## **We, us**

Irish Life Assurance plc (Irish Life).

## **You**

The person (or people) named as the proposer in the plan schedule, who is responsible for making the payments and is legally entitled to the plan benefits as long as they have not been assigned (passed) to someone else. In the text describing each illness covered under the heading 'in simpler terms' in sections 4.6 and 4.7, we have assumed that the person who owns the plan (you) is also the person who is protected (the life assured). This may not always be the case. If it is not, we are referring to the life assured when we talk about an illness and the symptoms suffered.

# Mortgage Life Insurance

## Section 2

Describes the details of the plan

---

**2.1** This plan is designed to repay a mortgage if the life assured dies during the term of the plan as long as:

- the mortgage repayments are kept up to date; and
- the mortgage interest rate is no more than the interest rate we have assumed as shown on the plan schedule.

The benefits will reduce each month. If the mortgage interest rate is, on average, higher than the interest rate we have assumed, the cover will not be enough to repay the mortgage in full. If benefits are altered under section 5 the cover may not be enough to repay the mortgage in full.

This plan is provided by us (Irish Life Assurance plc) to you (the proposer or proposers named in the plan schedule).

The plan consists of the plan schedule, the table of protection benefits, these Terms and Conditions, any related information, and any extra rules which our head office staff may add in writing.

We have issued this plan to you on the understanding that the information given in your application in response to our questions and any related document is true and complete and that we have been given all information as required by those questions.

Your application includes your application form (a copy of which has been sent to you) and any other medical or other questionnaires you have provided.

You must answer all of the questions in your application honestly and with reasonable care. We have relied on the information you have given us when deciding to insure you and when setting the terms and premium. Where we ask you to answer a specific question, the subject matter of the question is material to the risk we are undertaking or the calculation of the premium or both.

This could include questions about your health, family history, lifestyle habits (such as smoking, drinking alcohol or taking illegal drugs), occupation, income, age, other financial details, hobbies, pastimes or any extra disclosures and confirmations, in relation to Insurance Ireland's 'Code of practice for Underwriting Mortgage Protection Insurance for Cancer Survivors'.

If any of the answers to the questions are not answered honestly and with reasonable care, we may be entitled (depending on the breach) to declare the plan void, refuse your claim, treat your insurance as if it was entered on different terms, or reduce your claim.

In any future application(s) for changes to your cover after the start date of your plan if any of the questions are not answered honestly and with reasonable care, we may be entitled (depending on the breach) to declare the plan void, refuse your claim, treat your insurance as if it was entered on different terms, or reduce your claim.

We may refuse to pay a claim even if there is no direct medical connection between the illness that caused the claim and the medical condition which was not revealed to us on the application for cover. To do this we must be able to show that the facts you did not tell us about at the time the application was completed would have affected our original decision to provide the cover. If cover is voided on one life on a dual or joint cover plan all cover will cease under that plan for both lives.

We will rely on what you have told us and you must not assume that we have automatically confirmed with your own GP or any doctor any information you have provided.

This plan is a protection plan only. You cannot cash it in at any time. Even if you have not made a claim by the time the period of cover ends, we will not return your payments. All cover under the plan will end on the 'expiry date of your protection benefits' shown in the plan schedule, unless some or all of it has ended before that for any of the reasons explained in these terms and conditions.

The benefits provided under this plan are stated in the plan schedule. If a benefit is not mentioned in the schedule, we do not provide that benefit. The amount of each benefit will reduce on a monthly basis over the full term of your plan. The table of protection benefits in the schedule shows this reduction on a monthly basis for the first year only. Although this reduction continues monthly, the table only indicates the amount of cover which applies at the start of each remaining year as long as benefits have not been altered under section 5.

We will pay claims only from the assets we hold to make payments due to customers. We will normally pay all benefits under this plan in the currency of Ireland.

In legal disputes Irish law will apply.

In the event of extraordinary circumstances beyond our control including, without limitation, act of civil or military authority; sabotage; crime; terrorist attack; war or other government action; civil disturbance or riot; strike or other industrial dispute; an act of god; national emergency; epidemic; flood, earthquake, fire or other catastrophe, we may be directly or indirectly prevented from fulfilling our obligations under or pursuant to this plan or from doing so in a timely manner.

If this happens, we are not liable for any loss, damage or inconvenience caused.

More detailed information on all these matters is in the relevant sections of these Terms and Conditions.

### **How does the plan work?**

You choose the type of cover you want, and make the payments to us as set out in the schedule. We describe the benefits in greater detail later on in these Terms and Conditions.

## **Who receives the money we pay out?**

We will normally pay any benefit due under the plan to you. If you die, we will pay the person who deals with your estate.

If you assign the plan to someone else (for example, you pass it to a bank to be placed with your title deeds as security for your mortgage), we will pay that person. Note the exceptions in relation to additional payments on specified illness cover (see section 4.7) children's life cover and children's specified illness cover (see section 7.5). Where a plan is assigned to someone else as security for a mortgage, we will not pay an extra amount to cover any interest on that mortgage between the date you submit a claim and the date that claim is paid. If the plan is written under trust, we will pay the trustee.

If there are two proposers, we will pay you jointly. If one of you has died, we will pay the other.

- 2.2** If your cover ends but is reinstated under section 3.4, we will reinstate it on the understanding that the information given in the evidence of health form in response to our questions and any related document is true and complete and that all information has been provided as required by those questions.

If this is not the case, we will be entitled to take the actions described below, depending on the nature of your breach.

You must answer all of the questions in your evidence of health form honestly and with reasonable care. We will rely on the information you provide when deciding to reinstate your cover and when setting the terms and premium. Where we ask you to answer a specific question, the subject matter of the question is material to the risk we are undertaking or the calculation of the premium or both.

If you have answered our questions honestly and with reasonable care, but if your answer includes a negligent misrepresentation (that is, not innocent or fraudulent), we are entitled to take the following actions:

- (a) If, being aware of the full facts, we would not have entered the plan on any terms, this plan will be treated as void from the start of cover and we will refuse all claims, but return your premium;
- (b) If, being aware of the full facts, we would have entered the plan on different terms, the plan will be treated as if it had been entered into on those different terms;
- (c) If, being aware of the full facts, we would have charged a higher premium for the plan, we can reduce your claim proportionately.

If your answers to our questions are false or misleading in any material respect, and you know that they are false or misleading or consciously disregard if they are false or misleading (a "fraudulent misrepresentation") or any of your conduct involved fraud, this plan will be treated as void from the start of your policy. If this happens, you will no longer be covered, we will not pay any claim and we will not return any payments.

If cover is voided on one life on a dual or joint cover plan all cover may cease under that plan for both lives, and we will tell you if this is the case.

### 2.3 Insurance Ireland - **Code of Practice** for Underwriting Mortgage Protection Insurance for Cancer Survivors (2023).

In the event that you rely on the Code of Practice in connection with an application for a mortgage life protection plan, a disclosed cancer diagnosis shall be disregarded if all of the following conditions apply:

- (a) you have ceased Active Treatment and are in Complete Remission for more than 7 years prior to your application (if originally diagnosed when you were aged over 18 years old) or for more than 5 years prior to your application (if originally diagnosed when you were aged under 18 years old; and
- (b) you are applying for an amount which is the lesser of the mortgage amount or €500,000; and
- (c) your application is for a mortgage life protection plan in connection with a mortgage on your Principal Private Residence;

and in addition Irish Life conditions:

- (d) you do not hold the same or similar product cover with any other life insurer in Ireland and
- (e) the mortgage amount is actually drawn down from your mortgage lender.

In the event that any of the above conditions are not met, we shall treat your plan application and claim in accordance with our normal application and claims process (including without limitation proportionally in reduction of sum assured as well as declining any such claim).

# Making payments

## Section 3

**Explains your responsibilities to make payments and explains what happens if you fall behind with your payments.**

---

- 3.1** Although each payment is due on the payment dates shown in the plan schedule, we give you 30 days to make the payment unless you make payments monthly, in which case we will give you 10 days to make the payment. (The time allowed is known as a 'period of grace'). If you become entitled to a benefit during a period of grace, we will take from your benefit any payment that you have not made.
- 3.2** If you have not made a payment by the end of the period of grace, your cover under the plan will end immediately. A payment is not made until we have received it. It is up to you to make sure that we receive your payment. We are entitled to pass on to you any charge which we have to pay because all or part of your payment for example, a direct debit is not paid.
- 3.3** If your cover under the plan ends as described in section 3.2, you can restore your cover within 90 days from the date the first missed payment became due. You must make all the payments which would have been due if your cover had not ended. You will not be entitled to benefits for anything that happens between the end of the period of grace and the date we receive all missed payments.
- 3.4** If, between 90 days and before 180 days after the first missed payment is due, you ask for cover to be restored, the life or lives assured must fill in an evidence of health form and all the payments, which would have been paid if cover had not ended, must be made. If the information on the evidence of health form shows that the health of the life or lives assured is now different to that declared on the application form, we may refuse to restore cover or restore the cover:
- without any change;
  - with an increased payment; or
  - with new conditions (for example, you might lose cover for certain specified illnesses)

If we decide to restore cover, we will ask you to start making payments again. You will not be entitled to benefits for anything that happens between:

- the end of the period of grace; and
- the date, following our agreement to restore cover, on which we receive all missed payments.

If we accept a payment (or part payment) which is no longer due, this does not mean that we are providing cover. We will return the amount we receive as soon as we discover the mistake.

# Your cover

## Section 4

**Explains the benefits you can choose under the plan.**

---

**4.1** The benefits provided for a life assured under this plan are shown in the plan schedule. If a benefit is not mentioned on the plan schedule, we do not provide that benefit. We will pay a claim when a 'benefit event' happens. The plan schedule also shows the amount of cover. If, at any stage during the term of your plan, you request to change your benefit amounts and we allow this, your cover amount will be different than that shown on your plan schedule, allowing for the normal benefit reductions on the plan. We will send you a revised plan schedule showing your new cover. You cannot increase your benefit amount once you have chosen to reduce it. The following benefits are available.

- Life cover,
- Life cover and specified illness cover (with the specified illness benefit amount being equal to the life cover benefit amount).
- Life cover and specified illness cover (with the specified illness benefit amount being less than the life cover benefit amount).

Your plan may also have guaranteed cover again (see section 5.2). Check your plan schedule to see which benefits apply in your case.

### **Accidental Death Benefit**

This is an automatic additional benefit. We will pay the death benefit (to a maximum of €150,000) on accidental death between the time the application is received by Irish Life (together with a completed direct debit) and the earlier of the following:

- the day of the final underwriting decision if terms are being offered
- the day of the underwriting decision if we are declining or postponing cover
- 30 days from the date we receive the application.

For this benefit "Accidental Death" means death caused solely and directly as a result of an accident caused by violent, visible and external means and independently of any other cause.

There are the following restrictions:

- The benefit payable is subject to the lesser of the life sum assured or €150,000
- The benefit is subject to a maximum entry age of 55
- Exclusions apply around the nature of the death e.g. suicide or intentional self-inflicted injury causing death are excluded. For full details of exclusions see section 6.

We will only pay once under Accidental Death Benefit in respect of any life, regardless of the number of plans or applications a person has with Irish Life.

In the case of joint life applications the benefit is only paid once, on the death of the first life to die.

**4.2** If we accept a claim for a benefit event, we will pay you.

- the amount of benefit set out in the plan schedule, less
- the amount (if any) by which it has been reduced by an optional reduction, less
- the amount by which it has been reduced under the normal benefit reductions under the plan.

There are two possible benefit events.

**(a)** A life cover benefit event

- If there is only one life assured (single life), when the life assured dies or is diagnosed as having a terminal illness; or
- If the plan is joint life, when the first of the lives assured dies, or is diagnosed as having a terminal illness. If both lives assured die at the same time, or if it is impossible to say who died first, we will assume the oldest life assured died first; or
- If the plan is dual life, when any of the lives assured dies, or is diagnosed as having a terminal illness.

**(b)** An accelerated specified illness cover benefit event

If there is only one life assured (single life), when the life assured is diagnosed as having a specified illness as defined in section 4.6; or

- If the plan is joint life, when the first of the lives assured is diagnosed as having a specified illness as defined in section 4.6; or
- If the plan is dual life, when either of the lives assured is diagnosed as having a specified illness as defined in section 4.6.

We then reduce the amount of life cover by the amount of any benefit we have paid for accelerated specified illness cover.

Check your plan schedule (and any subsequent letters we send you) to see which benefits apply.

**4.3** **(a)** If a life assured is diagnosed as having a terminal illness (as in section 4.5) we will pay the amount of life cover. No further payment will be made when the life assured dies. Also see part (e) of this section.

A terminal illness benefit will only be paid once per plan on Single/Joint Life plans and once for each life assured on Dual Life plans.

**(b)** If a life assured has accelerated specified illness cover, in certain circumstances we will reduce the amount of specified illness cover we will pay for a life assured by the amount of any benefit we have paid under section 4.7 (Additional Payment Specified Illness Cover) and section 4.8 (Prepayment of Surgery). If we have reduced the amount of specified illness cover to nothing for a life assured, all specified illness cover ends.

**(c)** For Single or Joint Life plans, if we pay a claim for an accelerated specified illness cover benefit event under section 4.6, all specified illness cover ends (including cover for those conditions listed in section 4.7). For example, this means that you cannot claim for a heart attack and then claim for cancer.

For Dual plans, if we pay a claim for an accelerated specified illness cover benefit event under section 4.6, the specified illness cover ends for the life that a claim was paid for. Specified illness cover remains for the other life on the plan.

- (d) The life cover we will pay for a life assured will be reduced by the amount of any benefit we have paid under accelerated specified illness cover under section 4.6.

For Single and Joint plans, if the amount of life cover is reduced to nil, all cover ends. If the amount of accelerated specified illness cover is the same as the amount of life cover, all cover will end when an accelerated specified illness cover benefit event happens.

For Dual plans, if the amount of life cover for a life assured is reduced to nil, all cover ends for this life assured. If the amount of accelerated specified illness cover is the same as the amount of life cover, all cover will end for this life assured when an accelerated specified illness cover benefit event happens.

- (e) For Single and Joint plans, if a life assured who has accelerated specified illness cover is diagnosed as having a specified illness and we previously paid a benefit for that life assured being diagnosed as having a terminal illness, we will not pay any further benefit as all benefits end on the payment for a terminal illness.

For Dual plans, if a life assured who has accelerated specified illness cover is diagnosed as having a specified illness and we previously paid a benefit for that life assured being diagnosed as having a terminal illness, we will not pay any further benefit for that life assured as all benefits end for that life assured on the payment for a terminal illness.

- (f) For Single and Joint plans, if the amount of accelerated specified illness is the same as the amount of life cover, all cover will end when the accelerated specified illness cover benefit event happens.

For Dual plans, if the amount of accelerated specified illness is the same as the amount of life cover for a life assured, all cover will end for that life assured when the accelerated specified illness cover benefit event happens.

#### **4.4 All life or specified illness cover under this plan will end:**

- at the end of a period of grace, if all or part of a payment has still not been made;
- on the expiry date, as shown in the plan schedule.

And

For Single and Joint Life plans:

- when a life cover benefit event happens; or
- when a specified illness cover benefit event happens (if the amount of the specified illness cover is the same as the amount of the life cover)

Or

For Dual Life plans:

- when a life cover benefit event has happened for both lives; or

- when a specified illness cover benefit event has happened for one life (if the amount of the specified illness cover is the same as the amount of the life cover) and a life cover benefit event has happened for the other life; or
- when a specified illness cover benefit event has happened for both lives (if the amount of the specified illness cover is the same as the amount of the life cover); whichever is earliest.

**4.5** A life assured is 'diagnosed as having a terminal illness' if the attending consultant gives a definite diagnosis that, our Chief Medical Officer agrees, satisfies both of the following:

- The illness has either no known cure or has progressed to the point where it cannot be cured; and
- In the opinion of the attending consultant that the illness is expected to lead to death within 12 months.

#### **4.6 Full Payment Specified Illness Conditions**

We will make a full payment for specified illness cover if the life assured is diagnosed as having a specified illness.

A life assured is 'diagnosed as having a specified illness' if on a date after the start date and before the expiry date of the specified illness cover benefit, the life assured has:

- had any surgery explained in the plan definitions in this section; or
- been diagnosed as having one of the illnesses or medical conditions referred to in a plan definition in this section.

The accelerated specified illness benefit payable will be that applicable on the date you are 'diagnosed as having a specified illness' as per the plan definition above.

#### **Explanatory notes**

The explanatory notes in the sections headed 'In simpler terms' are intended to provide a less technical explanation of the illness definitions, and some of the medical terms used within that definition. They are not intended as an alternative definition of the illness and will not be used to assess claims. In the event of any dispute, the illness 'definition' overrules the 'In simpler terms' explanation.

## **1. Alzheimer's disease** – resulting in permanent symptoms

### **Plan definition:**

A definite diagnosis of Alzheimer's disease by a Consultant Neurologist, Psychiatrist or Geriatrician. There must be permanent clinical loss of the ability to do all of the following:

- remember;
- reason; and
- perceive, understand, express and give effect to ideas. For the above definition, the following are not covered:
  - Other types of dementia.

### **In simpler terms:**

Alzheimer's disease occurs when the nerve cells in the brain deteriorate over time and the brain shrinks. There are various ways in which this can affect someone, for example, severe loss of memory and concentration and mental ability gradually failing.

A claim can be made if the life covered has been diagnosed by a consultant neurologist or consultant geriatrician as having Alzheimer's disease and his/her judgement, understanding and rational thought process have been seriously affected.

## **2. Aorta graft surgery** – or disease or traumatic injury

### **Plan definition:**

The undergoing of surgery for disease to the aorta with excision and surgical replacement of a portion of the diseased aorta with a graft.

The term aorta includes the thoracic and abdominal aorta but not the branches.

For the above definition, the following are not covered:

- Any other surgical procedure, for example the insertion of stents or endovascular repair.

We also cover surgery for traumatic injury to the aorta needing excision and surgical replacement of a portion of the aorta with a graft.

### **In simpler terms:**

The aorta is the main artery of the body. It supplies blood containing oxygen to other arteries. The aorta can become narrow (often because of a build-up of fatty acids on its walls) or it may become weakened because of a split (dissection) in the internal wall. The aorta may also weaken because of an 'aneurysm' which means that the artery wall becomes thin and expands. A graft might be necessary to bypass the narrowed or weakened part of the artery.

You can claim if you have had surgery to remove and replace a part of the thoracic or abdominal aorta, to correct narrowing or weakening, with a graft.

Surgery to the branches of the aorta are not covered as this surgery is generally less critical.

### **3. Aplastic anaemia** – of specified severity

#### **Plan definition:**

A definite diagnosis by a Consultant Haematologist of permanent bone marrow failure which results in anaemia, neutropenia and thrombocytopenia requiring treatment with at least one of the following:

- Blood transfusion
- Marrow stimulating agents
- Immunosuppressive agents
- Bone marrow transplant

For the above definition, the following are not covered:

- All other types of anaemia

#### **In simpler terms:**

Aplastic anaemia is a failure of the bone marrow to produce sufficient blood cells for the circulation. When this function of the marrow declines, the main blood constituents (red cells, white cells, platelets) decline or cease production and the individual becomes progressively more dependent on blood transfusions.

You can claim if a Consultant Haematologist diagnoses permanent bone marrow failure which is treated by blood transfusion, agents to stimulate the bone marrow, immunosuppressive agents or a bone marrow transplant.

### **4. Bacterial Meningitis** – resulting in permanent symptoms

#### **Plan definition:**

A definite diagnosis of Bacterial Meningitis causing inflammation of the membranes of the brain or spinal cord resulting in permanent neurological deficit with persisting clinical symptoms\*. The diagnosis must be confirmed by a Consultant Neurologist.

For the above definition, the following are not covered:

- All other forms of meningitis including viral meningitis. (Adult and Child cover)

#### **""permanent neurological deficit with persisting clinical symptoms" is defined as:**

Symptoms of dysfunction in the nervous system that are present on clinical examination and expected to last throughout the insured person's life.

Symptoms that are covered include numbness, hyperaesthesia (increased sensitivity), paralysis, localised weakness, dysarthria (difficulty with speech), aphasia (inability to speak), dysphagia (difficulty in swallowing), visual impairment, difficulty in walking, lack of coordination, tremor, seizures, dementia, delirium and coma.

The following are not covered:

- An abnormality seen on brain or other scans without definite related clinical symptoms
- Neurological signs occurring without symptomatic abnormality, e. g. brisk reflexes without other symptoms

- Symptoms of psychological or psychiatric origin.

### **In simpler terms:**

Bacterial meningitis is a life-threatening illness that results from bacterial infection of the meninges (the three layers of membrane that surround the brain and spinal cord). In many cases, it is possible to recover fully from bacterial meningitis with no lasting ill-effects. However, if there were lasting effects as outlined above, we would pay a claim.

You can make a claim if a consultant neurologist diagnoses bacterial meningitis which results in permanent brain/nerve damage. Examples of such damage include paralysis of the left- or right-hand side of the body or disturbed speech or hearing. All other forms of meningitis including viral are excluded.

## **5. Benign brain tumour or cyst** – resulting in permanent symptoms, surgery or radiosurgery

### **Plan definition:**

A non-malignant tumour or cyst originating from the brain, cranial nerves or meninges within the skull, resulting in any of the following:

- Permanent neurological deficit with persisting clinical symptoms\*; or
- Surgical removal of the tumour; or
- Stereotactic radiosurgery to destroy tumour cells. For the above definition, the following are not covered:
- Tumours in the pituitary gland.
- Tumours originating from bone tissue
- Angioma and cholesteatoma.

### **\*"permanent neurological deficit with persisting clinical symptoms" is clearly defined as:**

Symptoms of dysfunction in the nervous system that are present on clinical examination and expected to last throughout the insured person's life.

Symptoms that are covered include numbness, hyperaesthesia (increased sensitivity), paralysis, localised weakness, dysarthria (difficulty with speech), aphasia (inability to speak), dysphagia (difficulty in swallowing), visual impairment, difficulty in walking, lack of coordination, tremor, seizures, dementia, delirium and coma.

The following are not covered:-

- An abnormality seen on brain or other scans without definite related clinical symptoms
- Neurological signs occurring without symptomatic abnormality, e. g. brisk reflexes without other symptoms
- Symptoms of psychological or psychiatric origin.

### **In simpler terms:**

A benign brain tumour is a non-cancerous but abnormal growth of tissue. It can be very serious as the growth may be pressing on areas of the brain.

These growths can be life-threatening and may have to be treated by surgery. We will exclude other conditions that are not usually life-threatening.

The pituitary is a small gland at the base of the brain. An angioma is a benign lesion made up of a collection of small blood vessels. A cholesteatoma is an uncommon abnormal collection of skin cells inside your ear.

You can claim if you are diagnosed as having a benign tumour of the brain and you have had either radiotherapy or surgery to treat it, or are suffering from permanent neurological deficit (nerve damage) as a result of the tumour. Examples of tumours covered include gliomas, acoustic neuromas and meningiomas. Neurological symptoms must be permanent and as defined within the definition.

## **6. Benign spinal cord tumour or cyst** – resulting in permanent symptoms, surgery or radiosurgery

### **Plan definition:**

A non-malignant tumour of the spinal canal, meninges or spinal cord, causing pressure and/or interfering with the function of the spinal cord resulting in any of the following:

- surgery
- stereotactic radiosurgery
- permanent neurological deficit with persisting clinical symptoms\*

The diagnosis must be made by a Consultant Neurologist or Neurosurgeon and must be supported by CT, MRI or histopathological evidence.

For the above definition, the following are not covered:

- Angiomas.

**\*"permanent neurological deficit with persisting clinical symptoms" is clearly defined as:**

Symptoms of dysfunction in the nervous system that are present on clinical examination and expected to last throughout the insured person's life.

Symptoms that are covered include numbness, hyperaesthesia (increased sensitivity), paralysis, localised weakness, dysarthria (difficulty with speech), aphasia (inability to speak), dysphagia (difficulty in swallowing), visual impairment, difficulty in walking, lack of coordination, tremor, seizures, dementia, delirium and coma.

The following are not covered:-

- An abnormality seen on brain or other scans without definite related clinical symptoms
- Neurological signs occurring without symptomatic abnormality, e. g. brisk reflexes without other symptoms
- Symptoms of psychological or psychiatric origin.

### **In simpler terms:**

A benign tumour or cyst of the spinal canal or spinal cord is a non-cancerous but abnormal growth of tissue. It can be very serious as the growth may be pressing on areas of spinal cord or spinal canal.

You can claim if you are diagnosed as having a benign spinal cord tumour or cyst and have had surgery to have it removed, stereotactic radiosurgery to destroy tumour cells, or are suffering from permanent neurological deficit as a result of the tumour. Neurological symptoms must be permanent. We do not cover angiomas of the spinal cord or spinal canal.

## **7. Blindness – permanent and irreversible**

### **Plan definition:**

Permanent and irreversible loss of sight to the extent that even when tested with the use of visual aids (with glasses or lenses), vision is measured by an ophthalmologist to be either of the following:

- Visual activity of 3/60 or worse in the better eye using a Snellen eye chart, or
- Visual field is reduced to 20 degrees or less of an arc.

### **In simpler terms:**

You can claim only if you have irreversible loss of sight in both eyes to the extent that even using eye glasses or other visual aids, the sight in your better eye is confirmed by an Ophthalmologist or Consultant Physician as 3/60 or worse using the recognised sight test known as the Snellen eye chart. A Snellen chart is the test an optician uses, where you are asked to read rows of letters. 3/60 is the measure when you can only see at three feet away what someone with perfect sight could see at 60 feet away– or

Your visual field is reduced to 20 degrees or less of an arc. The visual field is the area of your surroundings that you can see at any one time and a visual field test will measure your entire scope of vision.

It is possible to be 'registered blind' (as certified by an eye specialist) even though the loss of sight may only be partial. Even if you are 'registered blind', your claim will only be met if the loss of sight meets the criteria outlined in our definition and cannot be corrected.

## **8. Brain injury due to anoxia or hypoxia – resulting in permanent symptoms**

### **Plan definition:**

Death of brain tissue due to reduced oxygen supply resulting in permanent neurological deficit with persisting clinical symptoms.\*

For the above definition the following are not covered:

- children under the age of 90 days

**\*"permanent neurological deficit with persisting clinical symptoms" is clearly defined as:**

Symptoms of dysfunction in the nervous system that are present on clinical examination and expected to last throughout the insured person's life.

Symptoms that are covered include numbness, hyperaesthesia (increased sensitivity), paralysis, localised weakness, dysarthria (difficulty with speech), aphasia (inability to speak), dysphagia (difficulty in swallowing), visual impairment, difficulty in walking, lack of coordination, tremor, seizures, dementia, delirium and coma.

The following are not covered:-

- An abnormality seen on brain or other scans without definite related clinical symptoms
- Neurological signs occurring without symptomatic abnormality, e. g. brisk reflexes without other symptoms
- Symptoms of psychological or psychiatric origin.

### **In simpler terms:**

Anoxia (no oxygen) or hypoxia (a poor oxygen supply) can result in permanent brain damage leaving the individual with lifelong problems. There are many causes including carbon-monoxide poisoning, near drowning, poisoning by anaesthesia and others.

## **9. Cancer** – excluding less advanced cases

### **Plan definition:**

Any malignant tumour positively diagnosed with histological confirmation and characterised by the uncontrolled growth of malignant cells and invasion of tissue.

The term malignant tumour includes:

- leukaemia
- sarcoma
- lymphoma (except cutaneous lymphoma - lymphoma confined to the skin).

The following are not covered:

- All cancers which are histologically classified as any of the following:
  - pre-malignant;
  - non-invasive;
  - cancer in situ;
  - having either borderline malignancy;
  - or having low malignant potential.
- All tumours of the prostate unless histologically classified as having a Gleason score 7 or above, or having progressed to at least TNM classification T2bNOMO.
- Chronic lymphocytic leukaemia unless histologically classified as having progressed to at least Binet Stage A.
- Any skin cancer (including cutaneous lymphoma), other than malignant melanoma that has been histologically classified as having caused invasion beyond the epidermis (outer layer of skin) i.e.  $\geq$  Clarks level 2.

- Basal Cell Carcinomas and Squamous Cell Carcinomas of the skin are specifically excluded from this cover.
- Any thyroid cancer unless histologically classified as having progressed to at least TNM classification T2N0M0.

### **In simpler terms:**

The term 'cancer' is used to refer to all types of malignant tumours (tumours which can spread to distant sites) as opposed to benign tumours (which do not spread elsewhere in the body). A tumour is caused when the process of creating and repairing body tissue goes out of control, leading to an abnormal mass of tissue being formed.

A malignant tumour:

- may grow quickly;
- often invades nearby tissue as it expands;
- often spreads through the blood or the lymph vessels to other parts of the body; and
- usually continues to grow and is life-threatening unless it is destroyed or removed.

You can claim if you are diagnosed as suffering from a malignant tumour which has invaded surrounding tissue, unless the type of cancer or tumour is specifically excluded. The claim must be supported by a microscopic examination of a sample of the tumour cells – this is known as 'histology'. The histology examination is performed on tissue removed during surgery or by biopsy (a procedure to remove a sample of the tumour for examination).

Cancers 'in situ' (cancers in a very early stage that have not spread in any way to neighbouring tissue) as well as pre-malignant and non-invasive tumours are not covered under this definition. (They may be covered on an additional payment basis, see section 4.7.) These are well-recognised conditions. Cancers detected at this stage are not likely to be life-threatening and are usually easily treated. An example of this would be carcinoma (cancer) in situ of the cervix (neck of the womb).

With increased and improved screening, prostate cancer is being detected at an earlier stage. At early stages these tumours are treatable and the long-term outlook is good. We will not pay a claim for prostate cancer under this cancer definition unless the tumour has a Gleason score (a method of measuring differentiation in cells) of greater than 6 (in other words, a Gleason score of 7 or above) or it has progressed to at least TNM classification of T2bN0M0. An additional payment benefit may be available (see section 4.7).

The 'Gleason score' and the 'TNM classification' are ways of measuring and describing how serious the cancer is and whether it has spread beyond the prostate gland based on its appearance under a microscope.

Leukaemia (cancer of the white blood cells) and Hodgkin's disease (a type of lymphoma) are both covered. However, chronic lymphocytic leukaemia must have progressed to Binet Stage A for us to consider a claim.

Most forms of skin cancer are relatively easy to treat and are rarely life-threatening. This is because they do not spread out of control to other parts of the body. The only form of skin cancer that we cover is malignant melanoma which has been classified as being a 'Clark level 2' or greater. Clark's system is an internationally recognised method of classifying skin melanomas and uses a scale of 1 to 5. A Clark level 1 reflects a very early melanoma which carries a favourable long-term outlook.

Early stage thyroid cancer is very treatable, and the prognosis for patients with these early stage thyroid cancers is very good. The TNM classification system is internationally recognised and used as a method of staging or measuring a tumour. The 'T' element relates to the primary tumour and is graded on a scale of 1 to 4. 1 represents a small tumour restricted to the organ. We will not pay a claim for a T1 thyroid cancer under this definition unless lymph nodes or metastases (the cancer spreading) are involved as measured by the 'N' and 'M' elements of TNM.

## **10. Cardiac arrest** – with insertion of a defibrillator

### **Plan definition:**

Sudden loss of heart function with interruption of blood circulation around the body resulting in unconsciousness and resulting in either of the following devices being surgically implanted:

- Implantable Cardioverter-Defibrillator (ICD); or
- Cardiac Resynchronization Therapy with Defibrillator (CRT-D). For the above definition the following are not covered:
- Insertion of a pacemaker
- Insertion of a defibrillator without cardiac arrest
- Cardiac arrest secondary to illegal drug abuse.

### **In simpler terms:**

Cardiac arrest happens when the heart suddenly stops beating, sometimes because of an abnormal heart rhythm (arrhythmia) or coronary heart disease. This can stop the heart from pumping blood which prevents oxygen being delivered to the body. Lack of oxygen to the brain causes loss of consciousness which in turn means that you stop breathing. A brain injury or death can occur if the arrest goes untreated.

A device known as an Implantable Cardioverter Defibrillator (ICD or CRT-D) can be implanted inside your body which will monitor the rhythm in your heart. If the rhythm becomes abnormal, the device will deliver an electric pulse or shock which will restore the rhythm back to normal and prevent a cardiac arrest.

You can claim if you have had a cardiac arrest followed by the permanent insertion of an ICD or CRT-D. A cardiac arrest not accompanied by the insertion of an ICD or CRT-D is not covered under this condition. A cardiac arrest secondary to illegal drug abuse is not covered under this condition.

## **11. Cardiomyopathy** – resulting in a marked loss of ability to do physical activity

### **Plan definition:**

A definite diagnosis of cardiomyopathy by a Consultant Cardiologist. There must be clinical impairment of heart function resulting in the permanent loss of ability to perform physical activities to at least Class 3 of the New York Heart Association classification of functional capacity\*. The diagnosis should be supported by a current echocardiogram or cardiac MRI showing abnormalities consistent with the diagnosis of cardiomyopathy.

\* New York Heart Association Class 3. Heart disease resulting in marked limitation of physical activities where less than ordinary activity causes fatigue, palpitation, breathlessness or chest pain.

For the above definition, the following are not covered:

- Cardiomyopathy secondary to alcohol or drug abuse
- All other forms of heart disease, heart enlargement and myocarditis..

### **In simpler terms:**

Cardiomyopathy is a disorder affecting the muscle of the heart, the cause of which is unknown. It may result in enlargement of the heart, heart failure, abnormal rhythms of the heart (arrhythmias) or an embolism (blockage of a blood vessel).

You can claim if you suffer cardiomyopathy which is permanent and causing symptoms which significantly hinder your normal everyday activities. To qualify for payment your physical ability must be measurable and limited to a specific degree (New York Heart Association Class 3). The NYHA Function Classification is a measure used to classify the extent of heart failure.

## **12. Chronic Pancreatitis** – of specified severity

### **Plan definition:**

A definite diagnosis of Chronic Pancreatitis by a consultant gastroenterologist. The diagnosis must be evidenced by the following:

- calcification of the pancreas
- malabsorption due to failure of secretion of pancreatic enzymes
- chronic inflammation of the pancreas as shown by Endoscopic Retrograde Cholangiopancreatography (ERCP) or Magnetic Resonance Cholangiopancreatography (MRCP).
- pancreatic duct dilatation, beading and stricture.

For the above definition the following is not covered

- Chronic pancreatitis secondary to alcohol or drug abuse
- Acute pancreatitis

### **In simpler terms:**

Pancreatitis is an inflammation of the pancreas, an organ that is important in both the digestive and endocrine systems of the body. Chronic pancreatitis is an ongoing,

inflammatory process with continued and permanent injury to the pancreas.

Acute pancreatitis is a sudden inflammation of the pancreas. It can be serious with severe complications. However, it usually settles and the patient can make a full recovery.

ERCP (endoscopic retrograde cholangiopancreatography) is a procedure that uses an endoscope (a thin, flexible telescope) to look at the bile duct and pancreatic duct. A dye can be injected into the bile duct and pancreatic duct so that these can be seen clearly on an X-ray.

MRCP (magnetic retrograde cholangiopancreatography) is a medical imaging technique that uses magnetic resonance imaging to visualise the biliary and pancreatic ducts.

### **13. Coma** – with associated permanent symptoms

#### **Plan definition:**

A state of unconsciousness with no reaction to external stimuli or internal needs which:

- requires the use of life support systems and
- results in associated permanent neurological deficit with persisting clinical symptoms\*.

For the above definition, the following is not covered:

- Medically induced coma
- Coma secondary to alcohol where there is a history of alcohol abuse
- Coma secondary to illegal drug abuse.

#### **“permanent neurological deficit with persisting clinical symptoms” is clearly defined as:**

Symptoms of dysfunction in the nervous system that are present on clinical examination and expected to last throughout the insured person's life.

Symptoms that are covered include numbness, hyperaesthesia (increased sensitivity), paralysis, localised weakness, dysarthria (difficulty with speech), aphasia (inability to speak), dysphagia (difficulty in swallowing), visual impairment, difficulty in walking, lack of coordination, tremor, seizures, dementia, delirium and coma.

The following are not covered:-

- An abnormality seen on brain or other scans without definite related clinical symptoms
- Neurological signs occurring without symptomatic abnormality, e. g. brisk reflexes without other symptoms
- Symptoms of psychological or psychiatric origin.

**In simpler terms:**

A coma is a state where a person is unconscious and cannot be brought round. Someone in a coma will have little or no response to any form of physical stimulation and will not have control of their bodily functions. Comas are caused by brain damage, most commonly arising from a head injury, a stroke or lack of oxygen.

**14. Coronary artery by-pass grafts****Plan definition:**

The undergoing of surgery on the advice of a Consultant Cardiologist to correct narrowing or blockage of one or more coronary arteries with by-pass grafts via a thoracotomy, a thoroscope or mini thoracotomy.

For the above definition, the following are not covered:

- balloon angioplasty, atherectomy, insertion of stents and laser treatment or any other procedures.

**In simpler terms:**

Coronary artery surgery may be necessary if one or more coronary arteries (the arteries which supply blood to the heart) are narrowed or blocked. The surgery is done to relieve the pain of angina or if the blocked artery is life-threatening.

Coronary artery bypass surgery is carried out by taking a healthy blood vessel and using it to direct blood past the diseased or blocked artery.

You are not covered under this definition for any other intervention techniques to treat coronary artery disease such as angioplasty or laser relief.

**15. Creutzfeldt-Jakob Disease – resulting in permanent symptoms****Plan definition:**

Confirmation by a Consultant Neurologist of a definite diagnosis of Creutzfeldt-Jakob disease resulting in permanent neurological deficit with persisting clinical symptoms\*.

**“permanent neurological deficit with persisting clinical symptoms” is clearly defined as:**

Symptoms of dysfunction in the nervous system that are present on clinical examination and expected to last throughout the insured person's life.

Symptoms that are covered include numbness, hyperaesthesia (increased sensitivity), paralysis, localised weakness, dysarthria (difficulty with speech), aphasia (inability to speak), dysphagia (difficulty in swallowing), visual impairment, difficulty in walking, lack of coordination, tremor, seizures, dementia, delirium and coma.

The following are not covered:-

- An abnormality seen on brain or other scans without definite related clinical symptoms
- Neurological signs occurring without symptomatic abnormality, e. g. brisk reflexes without other symptoms
- Symptoms of psychological or psychiatric origin.

**In simpler terms:**

CJD is a degenerative condition of the brain. As the disease progresses muscular coordination diminishes, the intellect and personality deteriorate and blindness may develop.

You can claim if your Consultant Neurologist confirms the diagnosis of CJD which has resulted in permanent neurological deficit.

**16. Crohn's disease** – of specified severity**Plan definition:**

A definite diagnosis by a consultant gastroenterologist of Crohn's disease resulting in all of the following:

- surgical resection to remove part of the small intestine or bowel on at least two separate occasions, and
- there must also be evidence of continued inflammation with on-going symptoms, despite optimal therapy with diet restriction, medication use and surgical interventions.

For the above definition, the following are not covered:

- Other types of inflammatory bowel disease.
- Intestinal biopsy.

**In simpler terms:**

Crohn's disease is a chronic condition that causes inflammation of the digestive tract. While there is no known cure for Crohn's disease, therapies can reduce symptoms and bring about remission.

The condition must be as severe as is described in the definition.

In order to claim you must have had at least two separate surgeries and have continued inflammation and symptoms despite optimal therapy or surgery.

**17. Deafness** – total, permanent and irreversible**Plan definition:**

Permanent and irreversible loss of hearing to the extent that the loss is greater than 95 decibels across all frequencies in the better ear using a pure tone audiogram.

**In simpler terms:**

You can claim if you have a severe form of deafness (to the degree described in our definition) as measured by a pure tone audiogram. A pure tone audiogram is a key hearing test used to identify hearing threshold levels in an individual. The test establishes the quietest sounds you are able to hear at different frequencies or pitches. A decibel is a measure of the volume of a sound.

You cannot claim if you have reduced hearing in one or both ears which does not meet this definition. You cannot claim if the deafness can be improved by the use of medical aids.

## 18. Dementia – resulting in permanent symptoms

### Plan definition:

A definite diagnosis of dementia by a Consultant Neurologist, Psychiatrist or Geriatrician. There must be permanent clinical loss of ability to do all of the following:

- Remember;
- Reason; and
- Perceive, understand, express and give effect to ideas.

For the above definition, the following is not covered:

- Dementia secondary to alcohol or illegal drug abuse.

### In simpler terms:

Dementia is a term used to describe a number of signs and symptoms characterised by the loss of cognitive functioning and intellect, and behavioural changes. Areas of cognition affected may be memory, concentration, language and problem solving.

A claim can be made if the life covered has been diagnosed by a consultant neurologist or consultant geriatrician or psychiatrist, as having Dementia and his/her judgement, understanding and rational thought process have been seriously affected. These symptoms must be permanent.

## 19. Encephalitis – resulting in permanent symptoms

### Plan definition:

A definite diagnosis of Encephalitis by a Consultant Neurologist resulting in permanent neurological deficit with persisting clinical symptoms\*.

**“permanent neurological deficit with persisting clinical symptoms” is clearly defined as:**

Symptoms of dysfunction in the nervous system that are present on clinical examination and expected to last throughout the insured person's life.

Symptoms that are covered include numbness, hyperaesthesia (increased sensitivity), paralysis, localised weakness, dysarthria (difficulty with speech), aphasia (inability to speak), dysphagia (difficulty in swallowing), visual impairment, difficulty in walking, lack of coordination, tremor, seizures, dementia, delirium and coma.

The following are not covered:-

- An abnormality seen on brain or other scans without definite related clinical symptoms
- Neurological signs occurring without symptomatic abnormality, e.g. brisk reflexes without other symptoms
- Symptoms of psychological or psychiatric origin.

### In simpler terms:

Encephalitis is an acute inflammation of the brain. The illness can vary from mild to life-threatening. Most people with a mild case can recover fully. More severe cases of Encephalitis may recover but there may be damage to the nervous system. This

damage can be permanent.

You can claim if you have a diagnosis of Encephalitis confirmed by a Consultant Neurologist and where there are neurological symptoms which the Neurologist deems to be permanent.

## **20. Heart attack – definite diagnosis**

### **Plan definition:**

Death of heart muscle, due to inadequate blood supply, that has resulted in all of the following evidence of acute myocardial infarction:

- New characteristic electrocardiographic (ECG) changes or other positive changes on diagnostic imaging tests; and
- The characteristic rise of cardiac enzymes or Troponins

The evidence must show a definite acute myocardial infarction. For the above definition, the following are not covered:

- Other acute coronary syndromes
- Angina without myocardial infarction

### **In simpler terms:**

A heart attack (myocardial infarction) happens when an area of heart muscle dies because it does not get enough blood containing oxygen. It is usually caused by a blocked artery and causes permanent damage to the part of the heart muscle affected. The blockage is usually caused by a clot (thrombosis) where the artery has already grown narrow.

To confirm the diagnosis, your doctor will usually test your heart using a machine called an electrocardiograph (ECG). This tells the doctor if there have been any changes in the heart's function and if it is likely that you have had a heart attack. You may also undergo diagnostic imaging tests (e.g Cardiac CT or MRI scan) Your doctor will also take a blood sample. This can show that markers are present in the blood (in the form of enzymes or troponins) at a much higher level than is normally expected.

You can claim if you are diagnosed as having suffered death of heart muscle. Your claim must be supported by an increase in cardiac enzymes or troponins that are typical of a heart attack (released into the bloodstream from the damaged heart muscle) and new ECG changes typical of a heart attack (or other positive changes on diagnostic imaging tests).

## **21. Heart valve replacement or repair**

### **Plan definition:**

The actual undergoing of a surgical procedure (including balloon valvuloplasty) to replace or repair one or more heart valves on the advice of a Consultant Cardiologist.

### **In simpler terms:**

Heart valves regulate and control the flow of blood to and from the heart. The

valves may become narrow or leak, and if one of the four heart valves is not working properly, an operation may be necessary to repair or replace the valve.

You will be able to claim if you undergo surgery to replace or repair a heart valve on the advice of a Consultant Cardiologist.

## **22. Heart structural repair**

### **Plan definition:**

The undergoing of heart surgery requiring thoracotomy on the advice of a consultant cardiologist, to correct any structural abnormality of the heart.

### **In simpler terms:**

Structural abnormalities include openings in the wall separating the left and right chambers of the heart.

You will be able to claim if you have surgery where the surgeon cuts into the chest wall to correct a structural abnormality of the heart.

## **23. HIV infection** – caught in the European Union, Norway, Switzerland North America, Canada, Australia and New Zealand, from a blood transfusion, a physical assault or at work in the course of performing normal duties of employment.

### **Plan definition:**

Infection by Human Immunodeficiency Virus resulting from:

- a blood transfusion given as part of medical treatment;
- a physical assault;
- an accident occurring during the course of performing normal duties of employment;

after the start of the policy and satisfying all of the following:

- The incident must have been reported to appropriate authorities and have been investigated in accordance with the established procedures.
- Where HIV infection is caught through a physical assault or as a result of an incident occurring during the course of performing normal duties of employment, the incident must be supported by a negative HIV antibody test taken within 5 days of the incident.
- There must be a further HIV test within 12 months confirming the presence of HIV or antibodies to the virus.
- The incident causing infection must have occurred in the European Union, Norway, Switzerland, North America, Canada, Australia or New Zealand.

For the above definition, the following is not covered:

- HIV infection resulting from any other means, including sexual activity or illegal drug abuse.

**In simpler terms:**

Human immunodeficiency virus (HIV) is generally recognised as the virus that causes acquired immune deficiency syndrome (AIDS). The virus can be passed on in several ways including through contaminated blood, bloodstained bodily fluids and infected needles. This benefit is designed to cover people who get HIV through their work or who have become infected as a result of a physical assault or a blood transfusion in the European Union, Norway, Switzerland, North America, Canada, Australia and New Zealand. The infection must happen after the start date of the plan and must be reported and investigated in line with established procedures.

**24. Intensive Care** – requiring mechanical ventilation for 10 consecutive days**Plan definition:**

Any sickness or injury resulting in the Life assured requiring continuous mechanical ventilation by means of tracheal intubation for 10 consecutive days (24 hours per day) or more in an intensive care unit in an acute care hospital.

For the above definition the following are not covered:

- sickness or injury as a result of drug or alcohol misuse or other self-inflicted means;
- children under the age of 90 days.

**In simpler terms:**

Mechanical ventilation involves using a machine to take over breathing for a patient. Tracheal intubation means placing a tube into the trachea (windpipe) to keep the airway open in patients if they cannot breathe on their own.

You can claim if there has been continuous tracheal intubation for 10 days or more.

**25. Kidney failure** – requiring permanent dialysis or transplant**Plan definition:**

Chronic and end stage failure of both kidneys to function, as a result of which permanent regular dialysis is necessary and ongoing or a kidney transplant is necessary.

**In simpler terms:**

The kidneys act as filters which remove waste materials from the blood. When the kidneys do not work properly, waste materials build up in the blood. This may lead to life-threatening problems. The body can function with only one kidney, but if both kidneys fail completely, dialysis (kidney machine treatment) or a kidney transplant will be necessary. In some circumstances it is possible for the kidneys to fail temporarily and recover following a period of dialysis.

You will be able to claim if both your kidneys fail completely and the condition is chronic and you need permanent regular dialysis or a kidney transplant.

## **26. Liver Failure – irreversible and end stage**

### **Plan definition:**

A definite diagnosis, by a Consultant Physician, of irreversible end stage liver failure due to cirrhosis resulting in all of the following:

- Permanent jaundice
- Ascites, and
- Encephalopathy

For the above definition, the following is not covered:

- Liver failure secondary to alcohol or illegal drug misuse.

### **In simpler terms:**

Liver failure is the inability of the liver to perform its normal synthetic and metabolic function. Liver failure occurs when a large portion of the liver is damaged.

You can claim if you are diagnosed by a Consultant Physician as having incurable liver failure caused by cirrhosis and showing particular symptoms. Jaundice is a yellow discoloration of the skin and eye whites due to abnormally high levels of bilirubin (bile pigment) in the blood stream. This jaundice must be a permanent feature. Ascites is a fluid build-up in the abdomen caused by fluid leaks from the surface of the liver and intestines. It can occur if the blood or lymphatic flow through the liver is blocked. Encephalopathy caused by liver failure is the deterioration of brain function due to toxic substances building up in the blood which are normally removed by the liver.

You cannot claim if the liver failure occurs as a direct or indirect result of excess alcohol consumption or illegal drug use.

## **27. Loss of Independence – permanent and irreversible**

### **Plan definition:**

The permanent and irreversible loss of the ability to function independently which is defined as follows:

1. Permanent confinement to a wheelchair, or
2. being permanently hospitalised or resident in a nursing home as a result of a medical impairment on the advice of a registered medical practitioner, or
3. being permanently unable to fulfil at least three of the following activities unassisted by another person:
  - The ability to walk 100 metres unaided
  - The ability to get into and out of a vehicle unaided.
  - The ability to put on, take off, secure and unfasten all necessary garments and any braces, artificial limbs or other surgical appliances.
  - The ability to feed oneself once food and drink has been prepared and made available.
  - The ability to wash in the bath or shower (including getting into and out of the bath or shower) such that an adequate level of personal hygiene can be maintained

- The ability to climb stairs without the assistance of special aids
  - The ability to manage bowel and bladder functions such that an adequate level of personal hygiene can be maintained.
4. or suffer from severe and permanent intellectual impairment which must,
- a. result from organic disease or trauma, and
  - b. be measured by the use of recognized standardized tests and
  - c. have deteriorated to the extent that requires the need for continual supervision and assistance of another person
- a. result from organic disease or trauma, and

The diagnosis must be confirmed to the satisfaction of the professional opinion of Irish Life's Chief Medical Officer and by a consultant physician, neurologist or geriatrician of a major hospital in Ireland or the UK.

In all of the above permanent means that, even with the best treatment available, the life assured is not expected to recover. The condition must continue for at least six months following diagnosis before the benefit can be claimed.

#### **In simpler terms:**

This benefit is intended to make your total cover more wide-ranging and will be particularly valuable as you get older. By focusing on the disability rather than the specific illness, extra cover is provided for a variety of events which may radically change your life.

## **28. Loss of Limb – permanent physical severance**

#### **Plan definition:**

Permanent physical severance of 1 or more hands or feet at or above the wrist or ankle joints.

If a life assured loses a limb as a result of their own deliberate act, or a penalty imposed by a court of law, we will not pay you any benefit under the plan.

#### **In simpler terms:**

You will be able to claim if you have lost a limb above the wrist or ankle joint either by injury or because they have had to be removed. This loss must be permanent.

We will not make a payment for loss of any individual fingers or toes or combination of fingers and toes.

If you lose a limb as a result of your own deliberate act, or a penalty imposed by a court of law, we will not pay you any benefit under the plan.

## **29. Loss of speech** – permanent and irreversible

### **Plan definition:**

Total permanent and irreversible loss of the ability to speak as a result of physical injury or disease.

### **In simpler terms:**

You will be able to claim only if you suffer from total and permanent loss of speech as a result of physical damage or disease.

## **30. Major organ transplant** – specified organs from another donor

### **Plan definition:**

The undergoing as a recipient of a transplant from another donor of bone marrow or a complete heart, kidney, liver, lung, or pancreas, or a lobe of liver, or a lobe of lung, or inclusion on an official Irish or UK waiting list for such a procedure

For the above definition, the following is not covered:

- Transplant of any other organs, parts of organs, tissues or cells.

### **In simpler terms:**

Serious disease or injury can severely damage the heart, lungs, kidneys, liver or pancreas. The only form of treatment available may be to replace the damaged organ with a healthy organ from a donor. This is a major operation and the tissues of the donor and patient must be matched accurately. For this reason a patient could be on a waiting list for a long period waiting for a suitable organ. We will also cover a bone-marrow transplant, or transplant of a lobe of the liver or a lobe of the lung.

You can claim if you have had a transplant of any of the organs listed or are on an official Irish or UK programme waiting list for a transplant.

## **31. Motor neurone disease** – resulting in permanent symptoms

### **Plan definition:**

A definite diagnosis of one of the following motor neurone diseases by a Consultant Neurologist.

- Amyotrophic lateral sclerosis (ALS)
- Primary lateral sclerosis (PLS)
- Progressive bulbar palsy (PBP)
- Progressive muscular atrophy (PMA)

There must be permanent clinical impairment of motor function.

### **In simpler terms:**

Motor neurone disease is a disease which affects the central nervous system that controls movement. As the nerves deteriorate the muscles weaken. There is currently no known cure and the cause of the disease is also unknown.

You can claim if there is a definite diagnosis by a consultant neurologist that you are suffering from motor neurone disease.

### **32. Multiple sclerosis or Neuromyelitis optica (Devic's Disease) – with past or present symptoms**

#### **Plan definition:**

A definite diagnosis of Multiple sclerosis or Neuromyelitis Optica (Devic's Disease) by a Consultant Neurologist. There must be a history of, or continuing clinical impairment of motor or sensory function caused by multiple sclerosis or neuromyelitis optica.

#### **In simpler terms:**

Multiple sclerosis is a disease of the central nervous system which destroys the protective covering (myelin) of the nerve fibres in the brain and spinal cord. The symptoms depend on which areas of the brain or spinal cord have been affected. They include temporary blindness, double vision, loss of balance and lack of co-ordination.

Devic's disease or neuromyelitis optica, (NMO) is a disease that is very similar to multiple sclerosis in terms of symptoms. However, it is recognised as a separate condition.

You can claim if you are diagnosed by a consultant neurologist as suffering from multiple sclerosis or Devic's disease and you have a history of or ongoing symptoms of the disease.

### **33. Necrotising Fasciitis**

#### **Plan definition:**

A definite diagnosis of life-threatening necrotising fasciitis or gas gangrene by a Consultant Physician, requiring immediate surgery to remove necrotic tissue and intravenous antibiotic treatment to prevent imminent death.

For the above definition, the following is not covered:

- All other forms of gangrene or cellulitis.

#### **In simpler terms:**

Necrotising fasciitis is a bacterial infection which spreads quickly in the body. It is caused by bacteria entering a wound.

Treatment is the cutting away (surgical removal) of dead body tissue. Medicines that kill bacteria (antibiotics) are given directly into a vein or veins (intravenous) to treat this condition.

In order to claim a hospital consultant doctor must require you to have both surgical and intravenous treatment.

### **34. Paralysis of One limb** – total and irreversible

#### **Plan definition:**

Total and irreversible loss of muscle function to the whole of any one limb.

#### **In simpler terms:**

The brain controls the movement of muscles in the body by sending messages through the spinal cord and nerves. Paralysis is normally caused by an injury to the spinal cord.

You will be able to claim if you suffer complete and permanent loss of the use of an entire limb.

### **35. Parkinson's disease (idiopathic)** – resulting in permanent symptoms

#### **Plan definition:**

A definite diagnosis of Idiopathic Parkinson's disease by a Consultant Neurologist. There must also be permanent clinical impairment that includes bradykinesia (slowness of movement) and at least one of the following:

- Tremor; or
- muscle rigidity; or
- postural instability

For the above definition, the following are not covered:

- Parkinsonian syndromes including but not limited to those caused by alcohol or drugs

#### **In simpler terms:**

Parkinson's disease is a disease of the central nervous system which affects voluntary movement. It happens when certain nerve cells (neurons) die or become impaired. Normally, these cells produce a vital chemical known as dopamine which allows smooth, co-ordinated function of the body's muscles and movement. The term 'idiopathic' means that the cause of the disease is not known, so any form of Parkinsonian syndrome brought on by a known cause such as drugs, toxic chemicals or alcohol is not covered.

### **36. Parkinson Plus Syndromes** – resulting in permanent symptoms

#### **Plan definition:**

A definite diagnosis by a Consultant Neurologist of one of the following Parkinson Plus syndromes:

- Multiple system atrophy
- Progressive supranuclear palsy
- Parkinsonism-dementia-amyotrophic lateral sclerosis complex
- Corticobasal ganglionic degeneration
- Diffuse Lewy body disease

There must be also permanent clinical impairment of at least one of the following:

- motor function; or
- eye movement disorder; or
- postural instability; or
- dementia

**In simpler terms:**

Parkinson-plus syndromes are a group of neurodegenerative disorders which share the features of idiopathic Parkinson's disease but with other unique characteristics specific to the condition diagnosed.

You can claim if you are diagnosed with one of the named Parkinson-plus syndromes and you have permanent symptoms as defined.

**37. Peripheral Vascular Disease – with bypass surgery**

**Plan definition:**

A definite diagnosis of peripheral vascular disease, due to atherosclerosis or Buerger's disease, with objective evidence from an ultrasound of obstruction in the arteries which results in by-pass graft surgery to an artery.

For this definition, the following is not covered:

- Angioplasty

**In simpler terms:**

Peripheral vascular disease happens when there is significant narrowing of arteries. Symptoms vary from feeling pain in your calf when exercising (intermittent claudication) to pain when resting (critical limb ischaemia), skin ulceration, and gangrene.

Atherosclerosis is caused when fatty deposits build up along the inner walls of an artery.

Buerger's disease (thromboangiitis obliterans) is caused by inflammation of the blood vessels (vasculitis). The blood vessels tighten and can become totally blocked.

Bypass surgery is carried out by taking a healthy blood vessel and using it to direct blood past the narrowed or blocked artery.

You are not covered under this definition for any other intervention techniques such as angioplasty.

**38. Pneumonectomy – the removal of a complete lung**

**Plan definition:**

The undergoing of surgery to remove a complete lung for disease or physical injury.

For the above definition, the following are not covered:

- Removal of a lobe of the lungs (lobectomy)
- Lung resection or incision.

**In simpler terms:**

The lungs are in the chest and transport oxygen from the air into the blood and remove carbon dioxide from the blood. Serious disease or injury can severely damage the lungs. In some cases, the only form of treatment available may be to remove a damaged lung.

You can claim if you have a complete lung removed due to illness or injury.

**39. Primary Sclerosing Cholangitis – of specified severity****Plan definition:**

A definite diagnosis of primary sclerosing cholangitis as evidenced by imaging confirmation of typical multifocal formation of strictures and dilatation of intrahepatic and/or extrahepatic bile ducts.

The following are not covered:

- All other causes of bile duct stricture formation and dilation.

**In simpler terms:**

Primary Sclerosing Cholangitis is a chronic liver disease in which the bile ducts inside the liver (intrahepatic) and outside the liver (extrahepatic) become inflamed. This causes scars to form in the ducts blocking the movement of bile. Bile builds up inside the liver and damages the liver cells, which causes hardening of the tissue affecting the liver's ability to work.

A stricture is an abnormal narrowing and dilatation refers to the widening or stretching beyond normal of the bile duct.

**40. Pulmonary Arterial Hypertension (idiopathic) – of specified severity****Plan definition:**

Pulmonary arterial hypertension of unknown cause that has resulted in all of the following:

- Elevated pulmonary arterial pressure
- Right ventricular dysfunction
- Shortness of breath.

For the above definition, the following are not covered:

- Pulmonary hypertension due to established cause
- Other types of hypertension.

**In simpler terms:**

Pulmonary arterial hypertension is a disease which happens when blood pressure in the pulmonary artery or the major blood vessel connecting the right heart ventricle and the lungs is higher than normal. There is no apparent cause (idiopathic). A higher pulmonary artery blood pressure means the heart has to work harder to pump enough blood into the lungs. Over time, the condition progresses and often results in heart failure.

## **41. Pulmonary Artery Graft Surgery**

### **Plan definition:**

The undergoing of surgery on the advice of a Consultant Cardiothoracic Surgeon for a disease of the pulmonary artery to excise and replace the diseased pulmonary artery with a graft.

### **In simpler terms:**

Pulmonary Artery surgery may be carried out for some disorders to the pulmonary artery, including pulmonary atresia (atresia means “no opening”) and aneurysm. A claim can be made if the life assured undergoes heart surgery to replace the diseased pulmonary artery with a graft.

## **42. Respiratory Failure of specified severity**

### **Plan definition:**

Confirmation by a Consultant Physician of chronic lung disease resulting in:

- The need for daily oxygen therapy on a permanent basis;
- Evidence that the oxygen therapy has been required for a minimum period of six months;
- FEV1 being less than 40% of normal; and
- Vital Capacity less than 50% of normal

### **In simpler terms:**

Respiratory Failure is a condition where the level of oxygen in the blood becomes too low or the level of carbon dioxide in the blood becomes too high.

You can claim if you have severe and chronic respiratory failure, evidenced by lung function tests showing forced expiratory volume less than 40% of normal and a vital capacity less than 50% of normal and you require daily oxygen therapy. FEV and VC are ways of measuring lung function.

## **43. Short Bowel Syndrome – requiring permanent parenteral**

### **Plan definition:**

A definite diagnosis by a Consultant Gastroenterologist, of short bowel syndrome, resulting from massive loss of the small intestine, and requiring parenteral nutrition on a permanent basis.

### **In simpler terms:**

Short bowel syndrome is a condition in which the body cannot absorb enough nutrients from food eaten because there is not enough working small intestine. The small intestine is where the majority of the nutrients are absorbed during digestion.

Parenteral Nutrition, also known as intravenous nutrition feeding, is a method of getting nutrition into the body through the veins.

#### **44. Spinal stroke** – resulting in permanent symptoms

##### **Plan definition:**

Death of spinal cord tissue due to inadequate blood supply or haemorrhage within the spinal column resulting in permanent neurological deficit with persisting clinical symptoms\*

**“permanent neurological deficit with persisting clinical symptoms” is clearly defined as:-**

Symptoms of dysfunction in the nervous system that are present on clinical examination and expected to last throughout the insured person's life.

Death of spinal cord tissue due to inadequate blood supply or haemorrhage within the spinal column resulting in permanent neurological deficit with persisting clinical symptoms\*

Symptoms that are covered include numbness, hyperaesthesia (increased sensitivity), paralysis, localised weakness, dysarthria (difficulty with speech), aphasia (inability to speak), dysphagia (difficulty in swallowing), visual impairment, difficulty in walking, lack of coordination, tremor, seizures, dementia, delirium and coma.

The following are not covered:-

- An abnormality seen on brain or other scans without definite related clinical symptoms
- Neurological signs occurring without symptomatic abnormality, e. g. brisk reflexes without other symptoms
- Symptoms of psychological or psychiatric origin

##### **In simpler terms:**

The spinal cord depends on a supply of blood to function properly. A disruption in the blood supply causes tissue damage and can block messages (nerve impulses) travelling along the spinal cord. A spinal stroke happens when the blood flow to the spinal cord has been blocked by internal bleeding (haemorrhage) or by a piece of tissue or a blood clot (a thrombus or embolus)

#### **45. Stroke** – of specified severity

##### **Plan definition:**

Death of brain tissue due to inadequate blood supply or haemorrhage within the skull resulting in all of the following evidence of stroke:

Neurological deficit with persisting clinical symptoms lasting at least 24 hours\*, and

Definite evidence of death of tissue or haemorrhage on a brain scan.

**\*“neurological deficit with persisting clinical symptoms” is clearly defined as:-**

Symptoms of dysfunction in the nervous system that are present on clinical examination and last for at least 24 hours. Symptoms that are covered include numbness, hyperaesthesia (increased sensitivity), paralysis, localised weakness, dysarthria (difficulty with speech), aphasia (inability to speak), dysphagia (difficulty

in swallowing), visual impairment, difficulty in walking, lack of coordination, tremor, seizures, dementia, delirium and coma.

For the above definition, the following are not covered:

The following are not covered:-

- Transient ischaemic attack.
- Traumatic injury to brain tissue or blood vessels.
- Death of tissue of the optic nerve or retina/eye stroke
- An abnormality seen on brain or other scans without definite related clinical symptoms
- Neurological signs occurring without symptomatic abnormality, e. g. brisk reflexes without other symptoms
- Symptoms of psychological or psychiatric origin.

#### **In simpler terms:**

The brain controls all the functions of the body, so damage to the brain can have serious effects. A stroke happens when there is severe damage to the brain caused by internal bleeding (haemorrhage) or when the flow of blood in an artery has been blocked by a piece of tissue or a blood clot (a thrombus or embolus) resulting in the brain being starved of oxygen.

This benefit does not include 'transient ischaemic attacks' (also known as ministrokes) where there is a short-term interruption of the blood supply to part of the brain, the main symptoms tend to be dizziness and temporary weakness or loss of sensation in part of the body or face.

#### **46. Systemic lupus erythematosus – of specified severity**

##### **Plan definition:**

A definite diagnosis of systemic lupus erythematosus by a Consultant Rheumatologist resulting in either of the following:

- Permanent neurological deficit with persisting clinical symptoms\*, or
- Permanent impairment of kidney function tests as follows:
  - Glomerular Filtration Rate (GFR) below 30ml/min

**“permanent neurological deficit with persisting clinical symptoms” is clearly defined as:**

Symptoms of dysfunction in the nervous system that are present on clinical examination and expected to last throughout the insured person's life.

Symptoms that are covered include numbness, hyperaesthesia (increased sensitivity), paralysis, localised weakness, dysarthria (difficulty with speech), aphasia (inability to speak), dysphagia (difficulty in swallowing), visual impairment, difficulty in walking, lack of coordination, tremor, seizures, dementia, delirium and coma. For the purpose of this definition - lethargy will not be accepted as evidence of permanent neurological deficit.

The following are not covered:

- An abnormality seen on brain or other scans without definite related clinical symptoms
- Neurological signs occurring without symptomatic abnormality, e. g. brisk reflexes without other symptoms
- Symptoms of psychological or psychiatric origin.

**In simpler terms:**

Systemic lupus erythematosus (SLE) is a chronic auto-immune connective tissue disease. The immune system attacks the body's cells and tissue resulting in inflammation and tissue damage.

The course of the disease is unpredictable with periods of illness alternating with remission. SLE is a multi-system disease because it can affect many different organs and tissues in the body. Systemic lupus erythematosus can be a mild condition treated by medication or there can be life-threatening complications. The condition can be present for many years without progressing to brain and kidney involvement.

You can claim if you are diagnosed with systemic lupus erythematosus by a Consultant Rheumatologist which is complicated by brain involvement resulting in permanent neurological deficit with persisting clinical symptoms or kidney involvement with a GFR below 30ml/min.

#### **47. Third Degree Burns of specified surface area**

**Plan definition:**

Burns that involve damage or destruction of the skin to its full depth through to the underlying tissue and covering at least the following:

- 20% of the body's surface area, or
- 20% surface area of the face which for the purpose of this definition includes the forehead and the ears, or
- 50% of both hands, requiring surgical debridement and/or grafting

**In simpler terms:**

There are three levels (degrees) of burns. The degree of burning depends on how badly the skin has been damaged. They are medically known as 'first', 'second' and 'third' degree. First-degree burns damage the upper layer of skin, but can heal without scarring (a common example of this is sunburn). Second-degree burns go deeper into the layers of skin, but can heal without scarring. Third-degree burns are the most serious as they destroy the full thickness of the skin.

You will be able to claim if you have suffered third-degree burns covering 20% or more of the surface area of your body, 20% or more of the surface area of the face, or 50% of both hands requiring surgical removal of the burnt tissue and/or skin grafting.

First- and second-degree burns are not covered under this definition.

#### **48. Traumatic brain injury** – resulting in permanent symptoms

##### **Plan definition:**

Death of brain tissue due to traumatic injury resulting in permanent neurological deficit with persisting clinical symptoms\*.

For the above definition, the following is not covered:

- Injury secondary to alcohol where there is a history of alcohol abuse
- Injury secondary to illegal drug abuse.

\*"permanent neurological deficit with persisting clinical symptoms" is clearly defined as:

## 4.7 Additional Payment Specified Illness Cover

This is an automatic additional benefit that only applies to a life assured if the plan schedule shows that the life assured has accelerated specified illness cover.

A life assured is 'diagnosed as having a specified illness' if on a date after the start date and before the expiry date of the specified illness cover benefit, the life assured has:

- had any surgery defined in a plan definition below; or
  - been diagnosed as having one of the illnesses or medical conditions referred to in a plan definition below.
- (a) We will make an additional payment for specified illness cover if a life assured is diagnosed as having one of the specified illnesses below, on a date after the start date and before the expiry date of the specified illness cover benefit.

The total amount we will pay through additional payments is limited to the amount of your accelerated specified illness as shown on your schedule. You are only allowed to claim once for each of the illnesses defined below.

For the illness Coronary Artery Angioplasty – of specified severity, the amount we will pay on single vessel coronary artery angioplasty is:

- €10,000; or
  - 18.75% of the amount of specified illness cover the life assured has;
- whichever is lower.

When the life assured goes on to have a second coronary angioplasty to another artery, we will pay:

- €30,000; or
  - 56.25% of the amount of specified illness cover the life assured has;
- whichever is lower.

Where the life assured undergoes a coronary angioplasty in 2 or more coronary arteries, where no previous claim has been made under this benefit, we will pay:

- €40,000; or
  - 75% of the amount of specified illness cover the life assured has;
- whichever is lower.

For the other illnesses defined below the amount we will pay is:

- €15,000; or
  - Half the amount of specified illness cover the life assured has;
- whichever is lower.

The accelerated specified illness cover benefit will be that applicable on the date you are 'diagnosed as having a specified illness'.

For children, the additional payment is the lesser of €7,500 or half of the specified illness benefit amount. We will only make an additional payment once for each child.

- (b) We will only make one payment per life on the plan for each of the illnesses defined below under (a) above. This payment is independent of the main specified illness cover benefit amount. The total amount we will pay through additional payments is limited to the amount of your accelerated specified illness as shown on your schedule.

- (c) We will not pay any benefit under this section if a life assured dies within 14 days of a diagnosis as described in (a).
- (d) If there is a claim paid under an additional payment definition, you cannot claim the full sum insured under a related full payment specified illness cover definition which occurs or is diagnosed within 30 days of the occurrence or diagnosis of the additional payment specified illness cover event. If an admissible claim arises within 30 days for a related condition, the full payment specified illness cover benefit will be paid less the amount previously paid under the additional payment definition. Once 30 days has elapsed since the occurrence or diagnosis of the additional payment specified illness, any admissible claim for a related condition under the full payment specified illness cover benefit will be assessed and paid independently.

In respect of an additional payment for serious accident cover, once 30 days have elapsed, in the event of a related claim for full payment specified illness cover the full payment specified illness cover benefit will be paid less the amount previously paid under the additional payment definition.

Conditions where this 30 day rule may occur are as follows:

- Angioplasty to correct Carotid Stenosis - Stroke/Heart Attack
- Cancer in situ (all definitions) - invasive cancer of the same site
- Cerebral aneurysm- Stroke
- Coronary Angioplasty - Heart attack
- Crohn's Disease additional payment- Crohn's Disease full payment
- Ductal Carcinoma in Situ, Breast - invasive breast cancer
- Thyroid cancer, early stage -  $\geq$  T2 thyroid cancer
- Liver resection- Cancer of liver and major organ transplant
- Low Level Prostate Cancer -  $\geq$  T2b Prostate Cancer
- Peripheral Vascular Disease, treated with angioplasty – peripheral vascular disease, treated with bypass/ heart attack/stroke.
- Pituitary tumour- invasive pituitary cancer
- Severe Burns/Third Degree 5% body – Third Degree Burns 20% body /20% face / 50% hands
- Significant Visual impairment – blindness
- Surgical Removal of one eye – Blindness
- Treatment for Cerebral AVM - Stroke

Once a full payment specified illness cover benefit is paid, the additional Payment Benefit ends immediately.

- (e) All the normal plan terms and conditions including but not limited to sections 6.3, 6.4 and 7.2 apply to these limited payments.

### **Explanatory notes**

The explanatory notes in the sections headed 'In simpler terms' are intended to provide a less technical explanation of the illness definitions, and some of the medical terms used within that definition. They are not intended as an alternative definition of the illness and will not be used to assess claims. In the event of any dispute, the illness 'definition' over rules the 'In simpler terms' explanation.

## **1. Aortic aneurysm – with endovascular repair**

### **Plan definition:**

We will make a limited payment for specified illness cover if a life assured undergoes endovascular repair of an aneurysm of the thoracic or abdominal aorta with a graft.

For the above definition the following are not covered:

- Procedures to any branches of the thoracic and abdominal aorta.

### **In simpler terms:**

The aorta is the main artery of the body. It supplies blood containing oxygen to other arteries. The aorta can become narrow (often because of a build-up of fatty acids on its walls) or it may become weakened because of a split (dissection) in the internal wall. The aorta may also weaken because of an 'aneurysm' which means that the artery wall becomes thin and expands. A stent graft might be necessary to bypass the narrowed or weakened part of the artery.

Endovascular repair involves a surgeon passing a catheter (a flexible plastic tube) through small incisions in a distal artery, through the blood vessels to the site of the aneurysm. The catheter delivers a stent graft (a fabric tube held in place by metal wire stents) to the site of the aneurysm where it is put in position in the affected segment of the aorta. The stent graft acts like a sleeve against the walls of the aorta to reinforce the weakened area allowing blood to pass through it without pushing on the aneurysm.

## **2. Brain abscess drained via craniotomy**

### **Plan definition:**

We will make a limited payment for specified illness cover if a life assured undergoes the surgical drainage of an intracerebral abscess within the brain tissue through a craniotomy by a Consultant Neurosurgeon. There must be evidence of an intracerebral abscess on CT or MRI imaging.

### **In simpler terms:**

A brain abscess results from an infection in the brain. Swelling and inflammation develop in response to the infection. Infected brain cells, white blood cells and organisms collect in an area of the brain, a membrane forms and creates the abscess. While this immune response can protect the brain from the infection, an abscess may put pressure on delicate brain tissue.

A craniotomy is a surgical operation in which part of the skull is removed in order to access the brain.

You can claim if you are diagnosed with an intracerebral abscess which is treated by surgical drainage by craniotomy by a Consultant Neurosurgeon. A craniotomy is a surgical operation in which part of the skull is removed in order to access the brain.

### **3. Cancer in situ of the anus – treated by surgery**

#### **Plan definition:**

We will make a limited payment for specified illness cover if a life assured has a definite diagnosis of a cancer in situ of the anus with surgery to remove the tumour.

For the above definition, the following are not covered:

- Anal Intraepithelial carcinoma (AIN) grade 1 or 2 is not covered.

#### **In simpler terms:**

The anus is the opening where the gastrointestinal tract exits the body. Cancer in situ is an early form of carcinoma that involves only the cells in which it began and has not spread to other tissues.

You can claim if you have been diagnosed with a cancer in situ of the anus and you have been treated by an operation to cut out the tumour.

Anal intraepithelial neoplasia (AIN) means there are abnormal cells in the lining of the anus. It is not cancer but the cells might develop into cancer in the future.

### **4. Cancer in situ of the cervix – with specified surgery**

#### **Plan definition:**

We will make a limited payment for specified illness cover if a life assured has a definite diagnosis of cancer in situ of the cervix uteri resulting in trachelectomy (removal of the cervix) or hysterectomy.

For the above definition, the following are not covered:

- Loop excision, laser surgery, conisation and cryosurgery; and
- Cervical intraepithelial neoplasia (CIN) grade 1 or 2.

#### **In simpler terms:**

The cervix (or neck of the uterus) is the lower, narrow part of the uterus (womb) that joins to the top of the vagina. Cancer in situ is an early form of cancer that involves only the cells in which it began and has not spread to other tissues.

You can claim if you have been diagnosed with a cancer in situ of the cervix and you are treated by removal of the cervix (trachelectomy) or removal of the uterus (hysterectomy).

The following less invasive treatments are not covered under this definition. Loop excision (removing the abnormal cells and tissue using a thin wire loop that's heated with an electric current), laser surgery (pinpointing and destroying abnormal cells on your cervix with a laser); conisation (cutting out a cone-shaped piece of tissue containing the abnormal cells).

Cervical intraepithelial neoplasia (CIN) means there are abnormal cells in the lining of the cervix. It is not cancer but the cells might develop into cancer in the future. CIN 1 and CIN 2 refer to mildly and moderately abnormal cells in the cervix and are not covered by this definition.

## **5. Cancer in situ of the colon or rectum – resulting in intestinal resection**

### **Plan definition:**

We will make a limited payment for specified illness cover if a life assured has a definite diagnosis of cancer in situ of the colon or rectum resulting in intestinal resection.

For the above definition, the following are not covered:

- Local excision and polypectomy are not covered.

### **In simpler terms:**

The colon is part of the digestive system. Its function is to reabsorb fluids and process waste products for elimination from the body. The rectum connects the lower colon to the anus. The rectum receives waste from the colon and stores it until it passes out of the body through the anus. Cancer in situ is an early form of cancer that involves only the cells in which it began and has not spread to other tissues.

You can claim under this definition if you have been diagnosed with a cancer in situ of the colon or rectum and you are treated by surgery to remove a portion of your large bowel (large intestine).

This benefit does not cover surgery which removes only the tumour and the area of normal tissue surrounding it (local excision). The removal of a polyp, or polyps, from the inside of the colon is also excluded from this definition. A polyp is an abnormal collection of tissue.

## **6. Cancer in situ of the larynx – with specified treatment**

### **Plan definition:**

We will make a limited payment for specified illness cover if a life assured has a definite diagnosis of a cancer in situ of the larynx which is treated with surgery, laser or radiotherapy.

### **In simpler terms:**

The larynx is part of the respiratory system. The main function of the larynx is to prevent food entering the airways and it also produces vocal sounds. Cancer in situ is an early form of cancer that involves only the cells in which it began and has not spread to other tissues.

You can claim if you have been diagnosed with a cancer in situ of the larynx and you are treated by: an operation (surgery), pinpointing and destroying abnormal cells with a laser (laser therapy), or the use of radiation to kill abnormal cells (radiotherapy).

## **7. Cancer in situ of the lung and bronchus – treated by specified surgery**

### **Plan definition:**

We will make a limited payment for specified illness cover if a life assured has a definite diagnosis of a cancer in situ of the lung or bronchus resulting in wedge resection or lobectomy.

Only one limited payment will be made resulting from the same condition. You will not be able to claim under cancer in situ of the lung and bronchus and single lobectomy for the same surgery.

**In simpler terms:**

The lungs and bronchus are parts of the respiratory system. Air enters your lungs when you breathe in and oxygen from the air moves from your lungs into your body. The lungs also remove waste gases from the body when you breathe out. A bronchus is a large air passage that begins at the end of the windpipe and branches into the lungs. Cancer in situ is an early form of cancer that involves only the cells in which it began and has not spread to other tissues.

You can claim if you have been diagnosed with a cancer in situ of the lung or bronchus and you are treated by an operation to remove the tumour, along with a triangular-shaped section of normal lung tissue around the tumour (wedge resection). You can also claim if you have been diagnosed with a cancer in situ of the lung or bronchus and you are treated by an operation to remove a complete lobe of the lung (a lobectomy). The right lung is divided into three lobes and the left lung into two. The lobes of the lungs are further divided into segments. A lobectomy is an operation to remove one or more of the lobes from a lung.

This contract also covers lobectomy for other causes under the heading of single lobectomy. We will not pay out for cancer in situ of the lung and bronchus under both the cancer in situ and the single lobectomy definitions.

## **8. Cancer in situ of the oesophagus, treated by specified surgery**

**Plan definition:**

We will make a limited payment for specified illness cover if a life assured has a definite diagnosis of a cancer in situ of the oesophagus, which has been treated surgically by removal of a portion or all of the oesophagus. A cancer in situ is a malignancy that has not invaded the basement membrane but shows cytologic characteristics of cancer. Histological evidence will be required.

For the above definition, the following are not covered:

- Treatment by any other method is specifically excluded.

**In simpler terms:**

The oesophagus is a muscular, membranous tube approximately 25 cm long which connects the mouth to the stomach. Cancer in situ is an early form of cancer that involves only the cells in which it began and has not spread to other tissues.

You can claim if you have been diagnosed with a cancer in situ of the oesophagus and you have been treated surgically by removal of part or all of the oesophagus.

This benefit does not cover any other disease or disorder of the oesophagus.

## **9. Cancer in situ of the oral cavity or oropharynx – treated by surgery**

### **Plan definition:**

We will make a limited payment under specified illness cover if a life assured is diagnosed with cancer in situ of the oral cavity or oropharynx with surgery to remove the tumour. Oropharynx includes lip, inside of cheek, floor of mouth, tongue, gums, hard palate, soft palate and tonsils.

For the above definition, the following is not covered:

- Treatment for Leukoplakia

### **In simpler terms:**

Cancer in situ is an early form of cancer that only involves the cells in which it began and has not spread to other tissues. You can claim if you have been diagnosed with a cancer in situ of the oral cavity or oropharynx (which includes the lip, inside of cheek, floor of mouth, tongue, gums, hard palate, soft palate and tonsils), which has been removed surgically.

Leukoplakia is a white patch that develops in the mouth. It is usually painless but is closely linked to an increased risk of mouth cancer.

## **10. Cancer in situ of the renal pelvis and ureter – of specified severity**

### **Plan definition:**

We will make a limited payment for specified illness cover if a life assured has a definite diagnosis of cancer in situ of the renal pelvis or ureter.

For the above definition the following are not covered:

- Non-invasive papillary carcinoma
- Tumours of TNM classification stage Ta.

### **In simpler terms:**

The renal pelvis is the area at the centre of the kidney where urine collects and then funnels into the ureter. The ureter is the tube that connects the kidney to the bladder. Cancer in situ is an early form of cancer that involves only the cells in which it began and has not spread to other tissues.

You can claim if you have been diagnosed with a cancer in situ of the renal pelvis or ureter.

You cannot claim for a cancer of the renal pelvis or ureter which is described as either non-invasive papillary carcinoma or stage Ta. This is an early cancer that is only found on the surface of the inner lining of the renal pelvis or ureter. It has not invaded (spread deeper into) the renal pelvis or ureter wall.

## **11. Cancer in situ of the testicle – requiring surgery to remove at least one testicle**

### **Plan definition:**

We will make a limited payment for specified illness cover if a life assured has a definite diagnosis of cancer in situ of the testicle (also known as intratubular germ

cell neoplasia unclassified or ITGCNU), histologically confirmed by biopsy, and as a result is treated by orchidectomy (complete surgical removal of the testicle)

For the above definition, the following are excluded -

- Treatment by any other method is specifically excluded.

**In simpler terms:**

The testicles form part of the male reproductive system. The testicles produce sperm and secrete testosterone.

Intratubular germ cell neoplasia unclassified is an uncontrolled, abnormal growth of cells which may develop into a testicular carcinoma.

You can claim if you have been diagnosed with a cancer in situ of one of the testicles (also known as intratubular germ cell neoplasia unclassified or ITGCNU) and you have been treated by an operation to remove an entire testicle (orchidectomy).

## **12. Cancer in situ of the urinary bladder**

**Plan definition:**

We will make a limited payment for specified illness cover if a life assured is diagnosed by histological confirmation of having urinary bladder cancer that has progressed to stage Tis - Cancer in situ - diffuse flat non-papillary tumour.

For the above definition the following is not covered:

- Any urinary bladder tumour which has been histologically classified as stage Ta (non-invasive papillary carcinoma)

**In simpler terms:**

The urinary bladder is where urine is stored temporarily before emptying through the urethra. Cancer in situ is an early form of cancer that involves only the cells in which it began and has not spread to other tissues.

Bladder cancer is often detected at an early stage because usually it shows signs and symptoms that are very noticeable before it becomes advanced.

You cannot claim for a cancer of the urinary bladder which is described as either non-invasive papillary carcinoma or stage Ta. This is an early cancer that is only found on the surface of the inner lining of the urinary bladder. It has not invaded (spread deeper into) the bladder wall.

## **13. Cancer in situ of the uterus – with specified surgery**

**Plan definition:**

We will make a limited payment for specified illness cover if a life assured has a definite diagnosis of cancer in situ of the lining of the uterus (endometrium) resulting in hysterectomy.

**In simpler terms:**

The uterus, or womb, is part of the female reproductive system. The implantation and nourishment of the fertilized egg takes place in the uterus. Cancer in situ is an

early form of cancer that involves only the cells in which it began and has not spread to other tissues.

You can claim if you have been diagnosed with a cancer in situ of the uterus and you are treated by a surgical operation to remove the uterus (hysterectomy).

#### **14. Cancer in situ of the vagina – with surgery**

##### **Plan definition:**

We will make a limited payment for specified illness cover if a life assured has a definite diagnosis of cancer in situ of the vagina resulting in surgery to remove the tumour.

For the above definition, the following are not covered:

- Laser surgery and diathermy; and
- Vaginal intraepithelial neoplasia (VAIN) grade 1 or 2.

##### **In simpler terms:**

The vagina is part of the female reproductive system. It is the muscular passageway from the outside of the body to the uterus (womb). Cancer in situ is an early form of cancer that involves only the cells in which it began and has not spread to other tissues.

You can claim if you have been diagnosed with a cancer in situ of the vagina and you have been treated by an operation to cut out the tumour.

The following treatments are not covered under this definition, laser surgery (a beam of high-energy light is used to vaporize the abnormal tissue); and diathermy (removal of abnormal cells using a heated probe).

Vaginal intraepithelial neoplasia (VAIN) are abnormal cells in the lining of the vagina (the passage leading from the vulva to the uterus). It is not cancer but the cells might develop into cancer in the future.

#### **15. Cancer in situ of the vulva – with surgery**

##### **Plan definition:**

We will make a limited payment for specified illness cover if a life assured has a definite diagnosis of cancer in situ of the vulva resulting in surgery to remove the tumour.

For the above definition, the following are not covered:

- Laser surgery and diathermy; and
- Vulval intraepithelial neoplasia (VIN) grade 1 or 2.

##### **In simpler terms:**

The vulva is the external part of the female reproductive system. The vulva is the area of skin that surrounds the urethra and vagina, including the clitoris and labia. Cancer in situ is an early form of cancer that involves only the cells in which it began and has not spread to other tissues.

You can claim if you have been diagnosed with a cancer in situ of the vulva and you have been treated by an operation to cut away the tumour.

The following treatments are not covered under this definition, laser surgery (a beam of high-energy light is used to vaporize the abnormal tissue); and diathermy (removal of abnormal cells using a heated probe).

Vulval intraepithelial neoplasia (VIN) are abnormal cells in the lining of the vulva. It is not cancer but the cells might develop into cancer in the future.

## **16. Ductal Carcinoma in Situ – Breast, treated by surgery**

### **Plan definition:**

We will make a limited payment for specified illness cover if a life assured has a definite diagnosis of a ductal carcinoma in situ of the breast, which has been removed surgically by mastectomy, partial mastectomy, segmentectomy or lumpectomy. A carcinoma in situ is a malignancy that has not invaded the basement membrane but shows cytologic characteristics of cancer. Histological evidence will be required.

### **In simpler terms:**

Carcinoma in situ is an early form of carcinoma that involves only the cells in which it began and has not spread to other tissues. The term 'ductal' refers to the ducts in the milk glands in the breast.

You can claim if you are diagnosed as having a ductal carcinoma in situ of the breast which is removed surgically.

No benefit is payable under this benefit for any other breast disorder.

## **17. Cancer in situ – other (sites not already mentioned) – with surgery**

### **Plan definition:**

We will make a limited payment for specified illness cover if a life assured has a cancer in situ diagnosed with histological confirmation and characterised by the uncontrolled growth of malignant cells that are confined to the epithelial linings of an organ and that has been treated by surgery to remove the tumour.

For the above definition, the following are not covered:

- Any skin cancer (including melanoma); and
- Tumours treated with radiotherapy, laser therapy, cryotherapy, cone biopsy, LLETZ (large loop excision of the transformation zone), diathermy treatment or topical therapy.

This definition includes but is not limited to, cancer in situ of the bile duct, gall bladder, liver, pancreas, stomach and thymus.

For this definition you can claim more than once as long as the in situ cancer is of a separate site to one previously claimed for and also is not covered under any of the cancer in situ definitions of named sites.

**In simpler terms:**

Cancer in situ is an early form of cancer that involves only the cells in which it began and has not spread to other tissues.

The epithelial lining is the tissue that covers the outer surfaces of organs and blood vessels throughout the body, as well as the inner surfaces of cavities in many internal organs.

You can claim under this definition if you have been diagnosed with a cancer in situ of an organ, not covered under its own specific heading in this contract, and you have been treated by an operation to cut out the tumour.

This benefit does not cover any form of skin cancer. Most forms of skin cancer are relatively easy to treat and are rarely life-threatening. This is because they do not spread out of control to other parts of the body. Malignant Melanoma which has been classified as being a 'Clark level 2' or greater is covered under our "Cancer – excluding less advanced cases" definition.

Treatment by any other method than cutting away the tumour is specifically excluded.

**18. Carotid Artery Stenosis – treated by Endarterectomy or Angioplasty****Plan definition:**

We will make a limited payment under specified illness cover if a life assured undergoes endarterectomy or therapeutic angioplasty with or without stent to correct symptomatic stenosis involving at least 70% narrowing or blockage of the carotid artery. Angiographic evidence will be required.

**In simpler terms:**

Endarterectomy is a surgical procedure to remove atheromatous plaques (fatty tissue) or a blockage in the lining of an artery. It is carried out by separating the plaque from the arterial wall. An angioplasty is a procedure which uses a temporarily inflated balloon on a catheter (tube) to widen a narrowed or blocked blood vessel by compressing plaque against the artery wall. A stent is a device inserted into an artery to help keep it open.

You can claim if you have had a 70% narrowing or blockage of the carotid artery treated by either endarterectomy or angioplasty. We will require a copy of the angiogram report showing 70% stenosis in the carotid artery.

You cannot claim under this benefit for any other treatment of the carotid artery or vascular system.

**19. Central retinal artery or vein occlusion (eye stroke) resulting in permanent visual loss****Plan definition:**

We will make a limited payment for specified illness cover if a life assured is diagnosed with death of the optic nerve or retinal tissue due to inadequate

blood supply or haemorrhage within the central retinal artery or vein, resulting in permanent visual impairment of the affected eye

For the above definition, the following are not covered:

- Branch retinal artery or vein occlusion, or haemorrhage, and
- Traumatic injury to tissue of the optic nerve or retina

**In simpler terms:**

The eye depends on a supply of blood to function properly.

An eye stroke happens when there is disruption in the blood supply to the optic nerve or central retinal artery or vein caused by internal bleeding (haemorrhage) or blockage resulting in permanent loss of vision in the affected eye.

**20. Cerebral or spinal aneurysm** – with surgery, stereotactic radiosurgery or endovascular repair

**Plan definition:**

We will make a limited payment for specified illness cover if a life assured undergoes treatment of a cerebral or spinal aneurysm via surgery, stereotactic radiosurgery, or undergoes endovascular treatment by using coils to cause thrombosis (embolization) of a cerebral or spinal aneurysm.

For the above definition, the following is not covered:

- Cerebral or spinal arteriovenous malformation.

**In simpler terms:**

A cerebral or spinal aneurysm is a weakness in the wall of a cerebral or spinal artery or vein resulting in a swelling of the blood vessel. A cerebral or spinal aneurysm can rupture, bleeding into surrounding tissue. Some cerebral aneurysms, particularly those that are very small, do not bleed or cause any problems.

You can claim if you have surgery, stereotactic radiosurgery, or endovascular treatment using coils under the care of a consultant neurologist or radiologist, as appropriate, to treat a cerebral or spinal aneurysm.

Stereotactic radiosurgery is a form of radiation therapy that focuses on a small area of the body. Endovascular treatment uses the natural access to the brain through the bloodstream via the arteries using catheters, balloons and stents.

**21. Cerebral or spinal arteriovenous malformation** – with surgery, stereotactic radiosurgery or endovascular repair

**Plan definition:**

We will make a limited payment for specified illness cover if a life assured undergoes treatment of a cerebral or spinal arteriovenous fistula or malformation via surgery or stereotactic radiosurgery or undergoes endovascular treatment by a consultant neurosurgeon or radiologist using coils to cause thrombosis (embolization).

For the above definition, the following is not covered:

- Intracranial or spinal aneurysm.

### **In simpler terms:**

A cerebral arteriovenous malformation (AVM) is an abnormal connection between arteries and veins in the brain or spine that interrupts normal blood flow between them. An AVM is characterised by tangles of abnormal and enlarged blood vessels. In serious cases, the blood vessels rupture.

An arteriovenous fistula is an abnormal passageway between an artery and a vein. Normally blood flows from arteries into capillaries and back to your heart in veins. When an arteriovenous fistula is present, blood flows directly from an artery into a vein, bypassing the capillaries. If the volume of blood flow diverted is large, tissues downstream receive less blood supply. Also, there is a risk of heart failure due to the increased volume of blood returned to the heart.

You can claim if you have surgery, stereotactic radiosurgery, or endovascular treatment using coils under the care of a consultant neurologist or radiologist, as appropriate, to treat a cerebral or spinal AVM or AV fistula.

Stereotactic radiosurgery is a form of radiation therapy that focuses on a small area of the body. Endovascular treatment uses the natural A cerebral arteriovenous malformation (AVM) is an abnormal connection between arteries and veins in the brain or spine that interrupts normal blood flow between them. An AVM is characterised by tangles of abnormal and enlarged blood vessels. In serious cases, the blood vessels rupture.

An arteriovenous fistula is an abnormal passageway between an artery and a vein. Normally blood flows from arteries into capillaries and back to your heart in veins. When an arteriovenous fistula is present, blood flows directly from an artery into a vein, bypassing the capillaries. If the volume of blood flow diverted is large, tissues downstream receive less blood supply. Also, there is a risk of heart failure due to the increased volume of blood returned to the heart.

You can claim if you have surgery, stereotactic radiosurgery, or endovascular treatment using coils under the care of a consultant neurologist or radiologist, as appropriate, to treat a cerebral or spinal AVM or AV fistula.

Stereotactic radiosurgery is a form of radiation therapy that focuses on a small area of the body. Endovascular treatment uses the natural access to the brain through the bloodstream via the arteries using catheters, balloons and stents.

## **22. Coronary Artery Angioplasty – of specified severity**

### **Plan definition:**

We will make a limited payment for specified illness cover if a life assured undergoes coronary artery angioplasty, atherectomy, laser treatment or stent insertion on the advice of a consultant cardiologist to correct:

- narrowing or blockages of at least 70%, confirmed by angiographic evidence, or
- narrowing or blockages where there is a fractional flow reserve ratio of <0.8.

Provided the above requirements are met, we will make the following payments:

- €10,000 (subject to limits above) on completion of coronary artery angioplasty, atherectomy, rotablation, laser treatment and/or insertion of stent(s) in one coronary artery.
- An additional €30,000 (subject to limits above) will be paid if the life assured undergoes a further coronary artery angioplasty, atherectomy, laser treatment or stent insertion provided it is not performed on the same coronary artery or its branches.
- €40,000 (subject to limits above) will be paid if the life assured undergoes coronary artery angioplasty, atherectomy, laser treatment or stent insertion in 2 or more coronary arteries, where no previous claim has been made under this benefit.

**In simpler terms:**

Arteries can become blocked with fatty deposits, like the ‘furring up’ of a kettle. If the blockages are in the coronary arteries close to the heart, this causes extra strain on the heart, which then may lead to more serious heart disease. We will need a copy of the angiogram reports showing at least 70% stenosis (narrowing) in the coronary arteries.

The fractional flow reserve (FFR) is defined as the pressure after a narrowing in an artery compared to the pressure before the narrowing. FFR is a procedure that accurately measures blood pressure and flow through a specific part of the coronary artery. FFR is carried out at the same time as the angiogram.

Balloon angioplasty involves a surgeon passing a fine balloon catheter (a flexible plastic tube) down one of the arteries to the heart (a coronary artery). When the balloon reaches the place where the artery has narrowed, it is inflated to force the walls of the artery apart.

Atherectomy and laser treatment are also techniques which involve passing a catheter into the blocked artery.

## **23. Crohn's disease** – treated with surgical intestinal resection

**Plan definition:**

We will make a limited payment if a life assured is diagnosed with Crohn's disease and has undergone surgery to remove part of the small or large intestine.

A definite diagnosis of Crohn's disease must be confirmed by a consultant gastroenterologist or by histological confirmation.

For the above definition, the following are not covered:

- Other types of inflammatory bowel disease
- Intestinal biopsy

**In simpler terms:**

Crohn's disease is a chronic condition that causes inflammation of the digestive tract. While there is no known cure for Crohn's disease, therapies can reduce symptoms and bring about remission.

You can claim if you have had an operation to surgically remove part of the small or large intestine (bowel) as a result of Crohn's disease.

We will not consider a claim for a diagnosis of Crohn's disease unless it has resulted in surgery as shown in the definition.

## **24. Cystectomy – Cystectomy**

### **Plan definition:**

We will make a limited payment for specified illness cover if a life assured undergoes complete surgical removal of the urinary bladder.

For the above definition the following are not covered:

- Urinary bladder biopsy;
- Removal of a portion of the urinary bladder.

### **In simpler terms:**

The urinary bladder is where urine is stored temporarily before emptying through the urethra. Cystectomy is the medical term for the surgical operation which removes the entire urinary bladder.

We will not consider a claim for a procedure in which small pieces of tissue are removed from the bladder to be tested under a microscope (urinary bladder biopsy); or for a surgical operation which removes a section but not all of the urinary bladder.

## **25. Gastrointestinal Stromal Tumour (GIST) – with surgery**

### **Plan definition:**

We will make a limited payment for specified illness cover if a life assured has a definite diagnosis of Gastrointestinal stromal tumour (GIST) of low malignant potential diagnosed by histological confirmation and that has been treated by surgery to remove the tumour.

For the above definition, the following is not covered:

- Tumours treated with radiotherapy, laser therapy, cryotherapy or diathermy treatment.

### **In simpler terms:**

Gastrointestinal stromal tumour (GIST) are soft tissue tumours that develop in the digestive system. Their most common sites are the stomach and small intestine.

Tumours of low malignant potential can be considered as 'in-between' tumours. They have some but not all the features to be classified as benign and they also have some features but not all to be classified as malignant.

You can claim if you have been diagnosed with a Gastrointestinal stromal tumour (GIST) and you are treated by an operation to cut away the tumour.

The following treatments are not covered under this definition: the use of radiation to kill abnormal cells (radiotherapy), pinpointing and destroying abnormal cells with a laser (laser therapy), treatment using extreme cold to freeze the abnormal cells to kill them (cryotherapy), or removal of abnormal cells using a heated probe (diathermy).

## **26. Implantable Cardioverter Defibrillator (ICD) for primary prevention of sudden cardiac death**

### **Plan definition:**

We will make a limited payment for specified illness cover if a life assured undergoes the insertion of an Implantable Cardioverter-Defibrillator (ICD) on the advice of a Consultant Cardiologist for primary prevention of sudden cardiac death.

For the above definition, the following is not covered:

- Insertion of a pacemaker

### **In simpler terms:**

An implantable cardioverter defibrillator (ICD) is a small electrical device implanted in patients who are at risk of sudden death due to life-threatening, irregular heart rhythms. The ICD monitors the rhythm of the patient's heartbeat. When the ICD records arrhythmia (abnormal electrical activity in the heart), it acts to restore rhythm.

We do not cover inserting a pacemaker under this definition as this is a different device.

## **27. Liver resection**

### **Plan definition:**

We will make a limited payment under specified illness cover if a life assured undergoes a partial hepatectomy (liver resection) on the advice of a specialist surgeon in gastroenterology and hepatology.

For this definition the following are not covered:

- Surgery relating to liver disease resulting from alcohol or drug abuse
- Surgery for liver donation (as a donor)
- Liver Biopsy

### **In simpler terms:**

A liver resection is surgery to remove part of the liver. There are many reasons for removing part of the liver, including benign tumours, cysts, or traumatic injury.

## **28. Low Level Prostate Cancer with Gleason score between 2 and 6 – Low Level Prostate Cancer with Gleason score between 2 and 6**

### **Plan definition:**

We will make a limited payment for specified illness cover if a life assured is diagnosed with a prostate cancer which has been histologically classified as having a Gleason score between 2 and 6 provided:

- The tumour has progressed to at least clinical TNM classification T1NOMO; and
- The client has undergone treatment by prostatectomy, external beam or interstitial implant radiotherapy

For the above definition, the following are not covered:

- Treatment with cryotherapy, transurethral resection of the prostate, 'experimental' treatments or hormone therapy.

**In simpler terms:**

With increased and improved screening, prostate cancer is being detected at an earlier stage. If prostate cancer is caught early, when it is still classified as 'low-grade', there is a good chance that treatment will be successful and the long-term outlook is good. The 'Gleason score' and the 'TNM classification' are ways of measuring and describing how serious the cancer is, and whether it has spread beyond the prostate gland based on its microscopic appearance. Cancers with a Gleason score less than or equal to 6 are less aggressive and have a better prognosis.

**29. Neuroendocrine Tumour (NET) of low malignant potential – with surgery**

**Plan definition:**

We will make a limited payment for specified illness cover if a life assured has a definite diagnosis of neuroendocrine tumours of low malignant potential, including Merkel cell cancer of the skin, diagnosed by histological confirmation and that has been treated by surgery to remove the tumour.

The following are not covered:

- Tumours treated with radiotherapy, laser therapy, cryotherapy or diathermy treatment

**In simpler terms:**

Neuroendocrine Tumours (NETs) form from cells that release hormones into the blood in response to signals from the nervous system.

Tumours of low malignant potential can be considered as 'in-between' tumours. They have some but not all the features to be classified as benign and they also have some features but not all to be classified as malignant.

You can claim if you have been diagnosed with a Neuroendocrine Tumour (NET) of low malignant potential and you are treated by an operation to cut away the tumour.

Merkel cell carcinoma is a type of skin cancer that forms when Merkel cells grow out of control.

The following treatments are not covered under this definition: the use of radiation to kill abnormal cells (radiotherapy), pinpointing and destroying abnormal cells with a laser (laser therapy), treatment using extreme cold to freeze the abnormal cells to kill them (cryotherapy), or removal of abnormal cells using a heated probe (diathermy).

**30. Ovarian Tumour of Borderline Malignancy / Low Malignant Potential– with surgical removal of an ovary**

**Plan definition:**

We will make a limited payment for specified illness cover if a life assured has a definite diagnosis of ovarian tumour of borderline malignancy/low malignant

potential that has been positively diagnosed with histological confirmation and has resulted in surgical removal of an ovary.

For the above definition, the following is not covered:

- Removal of an ovary due to cyst.

#### **In simpler terms:**

The ovary is part of the female reproductive system. It produces and releases eggs.

Tumours of low malignant potential can be considered as 'in-between' tumours. They have some but not all the features to be classified as benign and they also have some features but not all to be classified as malignant.

You can claim if you have been diagnosed with an ovarian tumour of borderline malignancy/low malignant potential and you are treated by an operation to remove the affected ovary (oophorectomy).

You cannot claim under this definition if you have an ovary removed due to the growth of a benign fluid filled sac (cyst).

### **31. Peripheral vascular disease – treated by Angioplasty**

#### **Plan definition:**

We will make a limited payment under specified illness cover if a life assured undergoes a balloon angioplasty, atherectomy, laser treatment or stent insertion on the advice of a cardiologist or vascular surgeon to correct at least 70% narrowing or blockage to an artery of the legs. Angiographic evidence will be required.

#### **In simpler terms:**

Peripheral vascular disease happens when there is significant narrowing of arteries. Symptoms vary from calf pain on exercise (intermittent claudication) to rest pain (critical limb ischaemia), skin ulceration, and gangrene.

Balloon angioplasty involves a surgeon passing a fine balloon catheter (a flexible plastic tube) into the narrowed artery. When the balloon reaches the place where the artery has narrowed, it is inflated to force the walls of the artery apart.

Atherectomy and laser treatment are also techniques which involve passing a catheter into the blocked artery.

If you have balloon angioplasty, atherectomy or laser treatment, you can claim if the treatment is to correct a 70% narrowing of an artery of the legs.

Under this definition, we do not cover peripheral vascular disease treated by any other method, including changing your lifestyle and medication.

### **32. Permanent Pacemaker Insertion for heartbeat abnormalities**

#### **Plan definition:**

We will make a limited payment for specified illness cover if a life assured has a definite diagnosis of an abnormal rhythm of heartbeat by a consultant cardiologist resulting in the insertion of an artificial pacemaker on a permanent basis.

**In simpler terms:**

A pacemaker is a small, battery-operated device, fitted in the chest or abdomen. This device senses when your heart is beating irregularly or too slowly, or missing beats. It sends an electrical signal to your heart that makes your heart beat at the correct pace.

**33. Pituitary tumour – Pituitary tumour surgery****Plan definition:**

We will make a limited payment for specified illness cover if a life assured has a definite diagnosis of a non-malignant tumour in the pituitary gland resulting in either of the following:

- Permanent neurological deficit with persisting clinical symptoms\*; or
- Treatment of the tumour by surgery or stereotactic radiosurgery

For the above definition, the following are not covered:

- Where symptoms of pituitary tumour are absent with on-going medical treatment
- Tumours in the brain

**\*"permanent neurological deficit with persisting clinical symptoms" is clearly defined as:**

Symptoms of dysfunction in the nervous system that are present on clinical examination and expected to last throughout the insured person's life.

Symptoms that are covered include numbness, hyperaesthesia (increased sensitivity), paralysis, localised weakness, dysarthria (difficulty with speech), aphasia (inability to speak), dysphagia (difficulty in swallowing), visual impairment, difficulty in walking, lack of coordination, tremor, seizures, dementia, delirium and coma.

The following are not covered:-

- An abnormality seen on brain or other scans without definite related clinical symptoms
- Neurological signs occurring without symptomatic abnormality, e. g. brisk reflexes without other symptoms
- Symptoms of psychological or psychiatric origin.

**In simpler terms:**

The pituitary gland makes hormones that control many other glands in the body. A pituitary tumour is a growth of abnormal cells in the pituitary gland. Most tumours of the pituitary gland are benign and slow-growing. However, they can cause a variety of symptoms including headache, loss of vision, and infertility. Treatment may include surgery, radiation therapy and drug therapy.

We do not cover pituitary tumours where symptoms are controlled by ongoing medication only.

### **34. Serious Accident Cover – resulting in at least 28 consecutive days in hospital**

#### **Plan definition:**

We will make a limited payment if a life assured suffers a serious accident resulting in severe physical injury where the life assured is immediately admitted to hospital for at least 28 consecutive days to receive medical treatment.

Severe physical injury means injury resulting solely and directly from unforeseen, external, violent and visible means and independent of any other causes.

We will also cover treatment in an inpatient rehabilitation centre, if the client is transferred directly from hospital to the rehabilitation centre for continuous treatment.

Only one additional payment or full payment will be paid resulting from the same accident.

For the above definition the following are not covered:

- Stays in hospital of less than 28 consecutive days
- Serious accident secondary to alcohol where there is a history of alcohol abuse
- Serious accident secondary to illegal drug abuse.

#### **In simpler terms:**

You can claim if you have a serious accident and are hospitalised for at least 28 consecutive days to receive medical treatment for your injuries. The 28 consecutive days can include time spent in a rehabilitation centre if you are transferred there directly from the hospital to continue your treatment. You can only make one claim for additional payment resulting from the same accident.

### **35. Severe Burns/3rd Degree Burns covering at least 5% of the body's surface**

#### **Plan definition:**

We will make a limited payment for specified illness cover if a life assured suffers burns that involve damage or destruction of the skin to its full depth through to the underlying tissue and covering at least 5% and less than 20% of the body's surface area.

#### **In simpler terms:**

There are three levels (degrees) of burns. The degree of burning depends on how badly the skin has been damaged. They are medically known as 'first', 'second' and 'third' degree. First-degree burns damage the upper layer of skin, but can heal without scarring (a common example of this is sunburn). Second-degree burns go deeper into the layers of skin, but can heal without scarring. Third-degree burns are the most serious as they destroy the full thickness of the skin.

You will be able to claim if you have suffered third- degree burns covering at least 5% and less than 20% of the surface area of your body.

### **36. Significant visual impairment** – permanent and irreversible

#### **Plan definition:**

We will make a limited payment for specified illness cover if a life assured suffers the permanent and irreversible reduction in the sight of both eyes to the extent that even when tested with the use of visual aids (with glasses or lenses), vision is measured by an ophthalmologist to be either of the following:

For the above definition the following are not covered:

- Vision is measured at 6/18 or worse in the better eye using a Snellen eye chart, or
- Visual field is reduced to 50 degrees or less of an arc.

#### **In simpler terms:**

You can only claim if you have irreversible loss of sight in both eyes to the extent that even using eye glasses or other visual aids, the sight in your better eye is confirmed by an Ophthalmologist or Consultant Physician and to the satisfaction of our Chief Medical Officer, as 6/18 or worse using the recognised sight test known as the Snellen eye chart. A Snellen chart is the test the Optician uses when you are asked read rows of letters. 6/18 is the measure when you can only see at six metres what someone with perfect sight would see at 18 metres away.

Or

Your visual field is reduced to 50 degrees or less of an arc. The visual field is the area of your surroundings that you can see at any one time. A visual field test will measure your entire scope of vision.

It is possible to be “registered blind” (as certified by an eye specialist) even though the loss of sight may be only partial. Even if you are “registered blind”, your claim will only be met if the loss of sight meets the criteria outlined in our definition and cannot be corrected.

### **37. Single Lobectomy** – the removal of a complete lobe of a lung

#### **Plan definition:**

The undergoing of medically essential surgery to remove a complete lobe of a lung for disease or traumatic injury.

For the above definition, the following are not covered:

- Partial removal of a lobe of the lungs (segmental or wedge resection)
- Any other form of lung surgery.
- Only one limited payment will be made resulting from the same condition. You will not be able to claim under single lobectomy and cancer in situ of the lung and bronchus for the same surgery.

#### **In simpler terms:**

The right lung is divided into three lobes and the left lung into two. The lobes of the lungs are further divided into segments. A lobectomy is an operation to remove one or more of the lobes from a lung.

You can claim if you have an operation to remove an entire lobe from the lung because it is diseased or because of a wound or an injury. You will not be able to claim if a segment of the lobe is removed, or for any other type of lung surgery. The operation to remove the entire lobe must be deemed medically essential by our Chief Medical Officer.

### **38. Surgical removal of one eye**

#### **Plan definition:**

We will make a limited payment for specified illness cover if a life assured undergoes surgical removal of a complete eyeball for disease or trauma. To qualify for payment, the removal of the eyeball must happen on a date after the start date and before cover ends.

#### **In simpler terms:**

You can claim if you have to have an eyeball removed as a result of disease or injury.

No benefit is payable for loss of sight in one eye unless it was medically necessary to proceed and remove the eyeball.

### **39. Syringomyelia or Syringobulbia – treated by surgery**

#### **Plan definition:**

We will make a limited payment if a life assured has a definite diagnosis of Syringomyelia or Syringobulbia by a Consultant Neurologist, which has been surgically treated.

#### **In simpler terms:**

Syringomyelia is a disorder in which a cyst or cavity forms within the spinal cord. The cyst can increase over time, destroying the centre of the spinal cord. If not treated surgically, syringomyelia can lead to progressive weakness, pain and loss of sensation in the arms and legs.

Syringobulbia is the same as syringomyelia, but the cyst or abnormal cavity exists within the brainstem.

### **40. Thyroid Cancer – early stage with surgery**

#### **Plan definition:**

We will make a limited payment for specified illness cover if a life assured has a definite diagnosis of thyroid cancer that has been histologically classified as having progressed to at least TNM classification T1N0M0 and where surgery has been performed to remove the tumour.

#### **In simpler terms:**

The thyroid is a gland in the neck which releases hormones to control how the body uses energy from food, a process called metabolism. Thyroid hormones regulate breathing, heart rate and temperature among other vital body functions.

TNM classification' is a worldwide measure of how serious cancer is, and whether it has spread beyond the original site, in this case the thyroid. The letter T is followed by numbers or letters (or both) to describe how far the main tumour has grown within and beyond the thyroid gland and whether it has grown into nearby tissues. Higher T numbers mean more extensive growth.

You can claim under this definition if you have been diagnosed with a T1 tumour of the thyroid and you have been treated by an operation to cut away the tumour.

Syringobulbia is the same as syringomyelia, but the cyst or abnormal cavity exists within the brainstem.

#### **41. Total colectomy, including colectomy for ulcerative colitis**

##### **Plan definition:**

We will make a limited payment if a life assured suffers a condition which is treated by the removal of the entire colon (large bowel).

The need for surgery to remove the entire colon must be confirmed by a consultant surgeon.

For the above definition, the following are not covered:

- Total colectomy as a result of Crohn's disease
- Partial removal of the colon

##### **In simpler terms:**

Ulcerative colitis is a chronic inflammatory bowel disease that affects the large intestine (colon) and the rectum. There is inflammation and ulceration of the innermost lining of the intestine. Common symptoms include diarrhoea, an urgent need to go to the toilet, rectal bleeding and abdominal pain.

If ulcerative colitis does not respond to medical treatment, surgery may be needed. Surgery involves permanently removing the colon (colectomy).

You can claim if you have had a colectomy to treat ulcerative colitis.

We will not consider a diagnosis of ulcerative colitis treated by medication unless it has resulted in removing the entire colon.

You can also claim if you have had your entire colon surgically removed due to another medical condition, but Crohn's disease is specifically excluded.

## 4.8 Prepayment of surgery

This section only applies to a life assured if the plan schedule shows that the life assured has accelerated specified illness cover.

- (a) If a life assured's specified illness cover has not ended, we will make an advance payment for specified illness cover if a life assured has to have coronary artery bypass surgery, heart valve replacement or repair, heart structural repair, or aorta graft surgery. Please note this does not cover the additional payment - 'Aortic aneurysm - with endovascular repair. You must provide proof (as set out below) of the need for the surgery before we will pay any benefit. We will not make a payment if the type of surgery is not included in a life assured's cover. The amount we will pay is:

- €30,000; or
- the amount of specified illness cover the life assured has; whichever is lower.

### **Proof needed for coronary artery surgery**

If a life assured needs coronary artery surgery, you must provide the following proof:

- Certification from a cardiologist or cardiac surgeon of a major hospital that the life assured is on a waiting list or scheduled for a coronary artery bypass graft. This need must be confirmed by our chief medical officer.
- A report on the symptoms which make the surgery necessary.
- The result of a recent angiogram showing the extent of the coronary artery disease.

### **Proof needed for heart valve replacement or repair and heart structural repair.**

If a life assured needs heart valve replacement or repair or heart surgery to correct a structural abnormality, you must provide the following proof:

- Certification from a cardiologist or cardiac surgeon of a major hospital that the life assured is on a waiting list or scheduled for heart surgery he or she definitely needs within one year in order to repair or replace one or more heart valves or to correct structural abnormalities. This need must be confirmed by our Chief Medical Officer.
- A report on the symptoms which make the surgery necessary.
- The result of a recent echocardiogram and angiogram showing significant heart valve disease or a significant structural defect of the heart.

### **Proof needed for aorta graft surgery**

If the life assured needs aorta graft surgery, you must provide the following proof:

- Certification from a cardiologist or vascular surgeon of a major hospital that the life assured is on a waiting list or scheduled for surgery he or she definitely needs in order to correct any narrowing or weakening of the thoracic or abdominal aorta by surgical replacement of a portion of the aorta with a graft. This need must be confirmed by our chief medical officer.
- A report on the nature of the disease or trauma and the symptoms.

Prepayment of surgery does not cover the additional payment - 'Aortic aneurysm  
- with endovascular repair.

- (b) We will only make one payment for a life assured under this section.
- (c) We will not make a payment under this section unless the life assured is alive when the claim is made.
- (d) If accelerated specified illness cover applies to a life assured:
  - i. we will permanently reduce the level of specified illness cover and life cover the life assured has by the amount of any benefit we pay under this section;
  - ii. if we pay a benefit under this section and this reduces the amount of specified illness cover to nothing, all specified illness cover for the life assured will end;
  - iii. if we pay a benefit under this section and this reduces the life cover to nothing, all cover for the life assured will end; and
  - iv. we will pay any specified illness cover which is left after the life assured has the surgery.

#### **4.9 Children's Life Cover**

If cover has not ended, we will pay €7,000 for the funeral expenses of the child of a life assured (see definitions) if the child dies at least six months after the start date. However, the six-month restriction will not apply if the child dies as a result of an accident that happened after the start date. For each child we will only pay a total of €7,000.

We will not pay this benefit from more than one plan, even if both of the child's parents are lives assured and even if the life (or lives) assured is covered by more than one plan which provides similar benefits.

#### **4.10 Children's Specified Illness Cover**

If your cover includes specified illness cover and this cover has not ended, any child (see definitions section) is covered from birth for children's specified illness cover except for the following specified illnesses(as defined in section 4.6)

- Brain injury due to anoxia or hypoxia; or
- Intensive Care requiring medical ventilation;

where cover is provided for children above the age of 90 days.

We will only pay children's specified illness cover benefit once for each child. This is so even if both parents are lives covered with specified illness cover, or even if the life assured is covered under more than one plan which provides similar benefits. The amount of children's specified illness cover benefit is the lower of €25,000 or half of your specified illness benefit amount. If there are two people named on the plan schedule as the lives covered (joint or dual life), the amount of children's specified illness cover benefit is the lower of €25,000 or half of the highest specified illness benefit amount.

We will pay the benefit for a child (subject to the exceptions above) who survives for more than 14 days after being diagnosed as having a specified illness (see section 4.6), we will pay a benefit for a child suffering one of the conditions listed under the specified illness cover additional payment benefits (see section 4.7) of €7,500 or half of the specified illness benefit amount for a single life, whichever is lower. If there are two people named on the plan schedule as the lives covered (joint or dual life), the additional payment for children is the lesser of €7,500 or half of the highest specified illness benefit amount. We only make an additional payment once for each child.

- If, in the professional opinion of our chief medical officer, symptoms first arose, the underlying condition was first suspected or the underlying condition was diagnosed or either parent received counselling or medical advice in relation to the condition before -
- The commencement date
- Your legal adoption of the child
- If the child is not alive on the date the claim is made.

All these terms and conditions apply to this cover as they apply to specified illness cover on the life assured including, but not limited to section 7.4.

In summary the cover start age for the children's benefits in sections 4.9 and 4.10 above.

| Type of Children's Cover           | Cover start age   |
|------------------------------------|---|
| Children's Life Cover              | Birth<br>Plan must be in force for 6 months unless death is as a result of an accident. |
| Children's Specified Illness Cover | Birth (*)   |

\*see section 4.10 for the exceptions for Children's Specified Illness Cover where the cover start age may be 90 days.

# Changing the level of cover

## Section 5

**Explains how your benefits reduce over the term of the plan, how you can take out some additional cover and have the right to alter your cover.**

---

- 5.1** The amount of each benefit will reduce on a monthly basis over the full term of your plan. The table of protection benefits in the plan schedule shows this reduction on a monthly basis for the first year only. Although this reduction continues monthly, the table only indicates the amount of cover which applies at the start of each remaining year.

### **5.2 Guaranteed Cover Again**

If the plan schedule shows that guaranteed Cover again applies, you can convert this plan into another plan without having to provide evidence of health. You must change the plan before the benefits that you wish to convert end. You may only do this once.

The following conditions apply.

- You must be under age 65 at the outset of the plan to select this option.
- The plan or cover must not have already ended as a result of missed payments or a benefit event happening.
- You will be offered a decreasing cover plan with a guaranteed payment and fixed term, assuming we have such a product available at that time.
- You cannot take out a guaranteed payment whole of life or level or increasing plan using this option.
- The initial level of cover under the new plan for a life assured cannot be greater than the level of cover under this plan on the date you convert the plan.
- Guaranteed Cover again applies to a maximum life cover sum assured of €5,000,000 and a maximum specified illness cover sum assured of €1,000,000. These limits apply to the total benefit amounts converted across all policies where the life assured has a cover.
- The term of your new plan plus your age when exercising cannot pass the current maximum expiry age limits. These are currently 75 for specified illness Cover and 85 for life cover, but these may change in the future.
- The cost of the new decreasing term assurance plan will be based on the terms which apply at that time.
- We will issue the new plan under our normal terms which apply at the time this plan is converted.
- Any special conditions which attach to this plan will apply to the new plan. This option may not be available if certain special conditions apply to your plan. You

can ask us whether any special conditions on your plan prevent you from taking up this option.

- If a life assured is classified as a smoker on this plan they will be classified as a smoker on the new plan. You may have the option of moving to non-smoker rates at the time of conversion, subject to process, sum assured, age criteria or other rules, that are then in place in relation to changes of smoker status.
- You must apply in writing before the expiry date of the benefit.
- You cannot get guaranteed cover again under the new plan.
- When you convert this plan, all cover under it will end.
- If we no longer offer specified illness cover, you may only convert any life cover benefit you have on the plan.
- The new plan will not provide cover for any illness or condition that is not insured under section 4 of this plan.
- If we have stopped giving cover for any of the illnesses or conditions in section 4 (if the life assured has this cover), these will not be insured under the new plan.
- If you have reduced your benefit amounts, the option will apply to the lesser of your current and original benefits.
- If there are differences between the illness or condition definitions given in this plan and the new plan, the definitions in the new plan will apply.

### **5.3 Guaranteed insurability option**

This is an automatic additional benefit. If cover has not ended, you can ask us to set up a new decreasing term assurance plan for the lesser of:

- 50% of your initial life cover and / or specified illness cover benefit (or your new benefit amount if you have reduced your level of cover); or
- €125,000 life cover and / or specified illness cover.

And, you do not have to provide evidence of health. This applies within three months of:

- Being granted a new mortgage or an increase in an existing mortgage (the increase in cover cannot be higher than the mortgage or increase in mortgage), where the new or increased mortgage arises from a move to a new house or significant improvements to the existing house. The mortgage must be drawn down; or
- getting married; or
- having or adopting a child; or
- an increase in the life assured's salary, as a result of a change in job or getting a promotion. In this instance, the percentage increase in the sum assured is limited to the percentage increase in salary. Your employment status must be employee / employed. This is not available where your employment status is self-employed, company director or partner.

You must be aged 55 or under in order to exercise this option. If the basis of cover is Joint or Dual Life, the older life must be aged 55 or under.

## 5.4 Optional Flexibility

This is an automatic additional benefit. If cover has not ended, you can ask us to set up a new decreasing term assurance plan for the lesser of:

- Reduce your cover or remove a benefit altogether.
- Reduce the term of your plan
- Increase your existing benefits
- Increase the term of your plan

The following conditions apply:

- You can only alter your benefits or the term of your plan during the first five years of your plan.
- To increase your benefits or the term of your plan you must be aged 49 or younger.
- The original term of your plan must be greater than ten years for you to be allowed to increase or reduce the term remaining on your plan.
- If you want to increase your benefits or extend your term the current life cover amount cannot exceed €500,000 per life, while the current specified illness cover amount cannot exceed €300,000 per life.
- The maximum benefit increase allowed is 20% of the current benefit amount.
- The maximum term extension allowed is 5 years.
- You cannot increase benefits or alter the term on plans that were rated or had exclusions at inception, nor is it permitted on cases that have submitted a claim prior to requesting the plan be altered.
- Where a benefit is being increased and / or a term is being extended, a declaration of health is required. You must be able to sign this in order for the alteration to be accepted.
- A benefit can only increase once.
- The term of the plan can only be extended once.
- Any accelerated serious illness cover amount cannot be greater than the life cover amount.
- If you choose to alter your plan, we will review your payments. Payments must be at least €13 a month (or another amount we may specify at the time).
- For your plan to continue, the life assured must always have life cover of at least €1,000.
- If you have chosen the guaranteed cover again option, it cannot be removed.

# Exclusions

## Section 6

**Explains the circumstances in which we will not pay benefits.**

---

- 6.1** If a life assured dies within a year of the start date, or within a year of increasing the life cover, as a result of suicide, or execution in a foreign country, we will not pay you any benefit under the plan for this life assured. But if your plan has been assigned as a condition of the granting of a loan, and the assignee can prove entitlement to all or part of the benefits under your plan, we will pay the lesser of the outstanding loan amount or the amount that would otherwise be payable under your plan, before the act which caused the death or for which the penalty was imposed.
- 6.2** If, within a year of the start date, or within a year of increasing the life or specified illness cover, a life assured is diagnosed as having a terminal illness as a result of their own deliberate act, we will not pay you any benefit under the plan for this life assured. But if your plan has been assigned as a condition of the granting of a loan, and the assignee can prove entitlement to all or part of the benefits under your plan, we will pay the lesser of the outstanding loan amount or the amount that would otherwise be payable under your plan, before the act which caused the terminal illness.
- 6.3** We will not pay accidental death cover benefit or specified illness cover benefit for coma, loss of limb, loss of independence, brain injury due to anoxia or hypoxia and intensive care requiring mechanical ventilation for 10 consecutive days, paralysis of a limb, third degree burns or traumatic head injury, and will not pay limited payments for third degree burns covering at least 5% of the body surface or surgical removal of one eye or the serious accident cover additional payment benefit, in any of the following circumstances.
- If the condition or accidental death is caused directly or indirectly by war, revolution or taking part in a riot or civil commotion.
  - If the condition or accidental death is caused, directly or indirectly by taking part in a criminal act.
  - If the condition or accidental death is self-inflicted or caused directly or indirectly by the life assured taking alcohol or taking illegal drugs.
  - If the life assured failed to follow reasonable medical advice or failed to follow medically recommended therapies, treatment or surgery.
  - If the condition or accidental death is caused by the life assured taking part in hazardous pursuits, including but not limited to the following.
    - Abseiling
    - Bobsleighbing
    - Boxing
    - Flying, taking part in any flying activity, other than as a passenger in a commercially licenced aircraft

- Hang gliding
- Horse racing (but not general equestrian activities)
- Motor car or motorcycle racing or sports
- Mountaineering
- Mixed Martial Arts
- Parachuting
- Pot-holing or caving
- Power boat racing
- Rock climbing
- Scuba diving.

- 6.4** We will only pay specified illness cover benefit, or life cover benefit for a life assured who has been diagnosed as having a terminal illness, if the life assured lives in one of the accepted countries. These are any Member State of the European Union, United Kingdom, Australia, Canada, New Zealand, Norway, South Africa, Switzerland and the USA. We reserve the right to refuse to accept medical evidence produced from any country, in respect of specified illness cover benefit, other than from a recognised hospital in Ireland or the UK or health professional resident in Ireland or the UK.
- 6.5** You must write and tell us immediately if a life assured starts living in a country that is not an accepted country. We will then decide whether cover can continue or not and on what basis. If Irish Life is not advised immediately in writing, or if cover for these benefits cannot continue and must be cancelled due to residence, then we will let you know and we may refund a proportion of your most recent monthly payment.

# Claims

## Section 7

**Explains how to make a claim and how we will assess your claim.**

---

**7.1** Your benefits have been calculated on the basis that the date of birth of the life assured is as shown on the application form. When you make a claim, we will ask you to provide proof of the date of birth. If the date of birth on the application form is not correct, we will recalculate the benefits in line with the correct date of birth.

**7.2** We will not consider any claim until we have received the following

- A completed claim form.
- If someone else makes a claim on your behalf, we will ask the person making the claim for a power of attorney
- If the life assured has died, we may ask for a grant of probate or letters of administration.
- Proof (in the form of a birth certificate) of the age of the life assured.
- The plan schedule, including any plan documents provided as a result of changes made to the plan. If they are not available, whoever makes the claim must accept legal responsibility if it turns out that someone else is entitled to the benefit.

If any of the information we have been given is not correct, true or complete, we may not pay the benefits claimed and may also alter the other benefits under the plan, or end the plan altogether, in accordance with Section 2.

**7.3** In respect of Life, Specified Illness or Terminal Illness, Irish Life reserves the right to refuse to accept medical or other required claim evidence produced in any country other than Ireland or the United Kingdom.

Any claim forms, medical reports or other claim related evidence should be submitted in the English language. If this is not possible certified English language translations (by a professional translation service) and the original documents must be provided by the claimant. Any associated costs incurred by Irish Life in relation to the translation or the verification of claim related documents provided by the claimant or third parties including doctors will be deducted from any claim benefits payable.

**7.4** If you are claiming for the death of a life assured or the funeral expenses of a child, we are entitled to ask for proof of death in the form of a death certificate, and any other proof we reasonably need.

**7.5** If you are claiming life cover benefit for a terminal illness, or specified illness cover benefit or children's specified illness cover benefit you must tell us, in writing, about the surgery or diagnosis within six months of the day on which it occurred. If you do not, we may refuse to pay the benefit. You must provide and pay for any certificates, tests, information or evidence, which we reasonably need to prove your claim. The life assured or child must agree to any medical examinations and tests which

are necessary to prove your claim, and if they die we may ask for a post mortem examination. If you fail or the life assured or the child fails to meet these requirements within a reasonable time, or if the life assured or child fails to follow the advice of a registered medical practitioner, we will not pay the benefits until you, or the life assured, correct this failure. If this failure cannot be corrected, then we may refuse to pay the claim. We may also change the benefits for the life assured or end the plan altogether.

- 7.6** If a claim is admitted for children's life cover or children's specified illness cover, we will pay the benefits directly to the life (or lives) assured. We will pay these directly to the life (or lives assured), rather than to any assignee, as these do not affect any lender's security under the plan.
- 7.7** If you make a claim for life cover in respect of a mortgage life protection plan that was originally taken out in accordance with the Insurance Ireland - Code of Practice Underwriting Mortgage Protection Insurance for Cancer Survivors (2023), We will ask for evidence that all the conditions of such cover had been satisfied when the plan started.

We will not pay the claim until we have received any such evidence requested by us, at the time a claim is submitted and we are satisfied that the life cover application under the Code was valid at the commencement of the plan.

If any of the information we have been given is not correct, true or complete, we will not pay the benefits claimed and may also alter the other benefits under the plan, or end the plan altogether.

# Tax

## Section 8

**Explains what will happen if there is any change in Irish tax law.**

---

- 8.1** Under current Irish law, tax does not have to be taken from life cover or specified illness cover benefits. A government levy is charged on payments that you make under this plan (as at November 2024).
- 8.2** Any taxes or levies imposed by the Government will be deducted by Irish Life. We will deal with this plan in line with the requirements of Revenue. If Irish tax laws or any other relevant laws change after the start date, we will change the terms and conditions of the plan if we need to do this to keep the plan in line with those changes. We will tell you about any changes in the terms and conditions.

We recommend that you seek independent tax advice in respect of your own specific circumstances.

# Cancellations

## Section 9

**We recommend that you seek independent tax advice in respect of your own specific circumstances.**

---

### **Cooling-off period**

If, taking out this plan, you feel it is not suitable, you may cancel it by writing to us at:

Irish Life Assurance plc.  
Irish Life Centre  
Lower Abbey Street  
Dublin 1  
Ireland.

If you do this within 30 days from the date we send you your plan documents (or a copy), we will return any payments you have made. We strongly recommend that you consult with your EBS financial adviser before you cancel your plan.

# Complaints

## Section 9

Explains how to make a complaint.

---

After you contact us with a complaint, we will do our best to sort out any complaints fairly and quickly through our internal complaints procedure. If you are not satisfied with the outcome of your complaint, you can take your complaint to the Financial Services and Pensions Ombudsman. You can get more information from:

Financial Services and Pensions Ombudsman,  
Lincoln House,  
Lincoln Place,  
Dublin 2,  
D02 VH29.
