*OLTV for top-up loans is calculated by combining the original loan amount and the top-up loan amount. This does not take into account any reduction in the original loan amount that occurred prior to the top-up approval. The OLTV on top-up loans is therefore shown here as higher than the true exposure at the time the top-up was approved. The true exposure on all loans, including top-ups, was 100% or less at loan approval.
